SPECIFICATIONS

EXPANDABLE SHOWER DOOR
2" EXPANSIBILITY
ADAPTABLE TO OFF SQUARE OPENINGS

MODEL X MAGNETIC STRIKE

TOOLS REQUIRED FOR INSTALLATION OF MODEL X DOOR:

1. Caulking gun + approved silicone sealant
2. Rubber mallet
3. Hacksaw
4. Philips screwdriver
5. Mill file to smooth cut edges or radius
6. 1/8" drill bit for 6x screws
7. 9/64" drill bit for 8x screws
8. 5/32" drill bit for 10x2 screws
9. 1/4" drill bit for plastic anchors
10. 1/4" carbide drill bit for tile anchors

- 1 Measure finished opening width at bottom of stall. Cut threshold to this dimension. Radius ends if stall has rounded corners (fiberglass).

- 2 Place wall jambs on threshold and plumb. Mark hole locations and drill 1/4" holes for plastic anchors.

- 3 Install plastic anchors. Secure wall jambs with 10x2" pan head screws.

- 4 Place hinge portion of door into wall jamb. Drill and temporarily fasten with a 6x3/8" sheet metal screw.

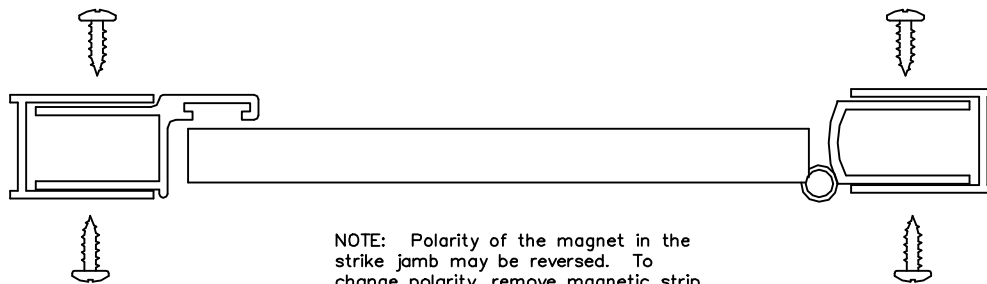

- 5 Insert strike jamb into wall jamb. Adjust door and strike jamb so magnetic catch operates properly.

Note: the strike jamb and the door hinge slide in wall jambs to allow for adjustment to be made.

- 6 Make final adjustments and secure jambs with 6x3/8" pan head screws. Three screws should be used inside and on the outside of the jambs.

NOTE: Polarity of the magnet in the strike jamb may be reversed. To change polarity, remove magnetic strip from strike jamb, turn end for end, and re-install.

- 7 Locate and drill holes through threshold at wall jambs as illustrated. Secure threshold to wall jambs with one 6x3/4 screw at each end.

- 8 Install gutter over gutter vinyl at door bottom with 6x3/8 screws. Be sure gutter slopes down to hinge end, and vinyl extends to within 1/8" of threshold.

- 9 NOTE: We recommend filing any sharp corners that may cause injury, then clean and run a continuous bead of sealant along the outside of the threshold and up the wall jambs.

Do NOT caulk inside of the unit.
