

Multizone Wireless Control for Radiant and Air-Side Comfort

The Ultimate Smart Solution for Maximum Energy Efficiency

Welcome to a new dimension of the smart home with Smatrix Pulse. Now, homeowners can enjoy precise wireless control of their radiant floor heating as well as their forced-air heating and cooling systems all with one solution that connects to a smart home assistant and can also be controlled remotely via an app.

Download the Smatrix Pulse App for quick installation and remote system control.

Install Easier

Eliminate thermostat wiring hassles and enjoy faster, easier installs with the Smatrix Pulse app installation wizard (no internet needed).

Control from Anywhere

Gain optimal comfort control in each temperature zone from anywhere in the world with internet via the Smatrix Pulse app or a favorite voice assistant.

Measure Comfort More Precisely

Accurately measure air, surface, and floor temperatures in each zone with embedded operative sensors in the thermostats along with optional slab sensors.

Maximize Efficiencies

Benefit from continuous monitoring inside and outside the structure to adapt each zone independently.

Leverage Quality

Experience long-lasting, intelligent design with the latest encryption technology and cloud functionality from the experts in radiant heating.

SMATRIX PULSE CONTROL SYSTEM

Controller with Communication Module

Configures up to six thermostats, eight actuators, and one remote relay using local networks; internet connects controller, mobile app, and the cloud.

Relay Module

Connects wirelessly to a furnace, air conditioner, heat pump, fan, zone valve, or boiler.

Digital Thermostats

Elegant, slim thermostats with an operative temperature sensor to enable a more-precise measurement of thermal comfort.

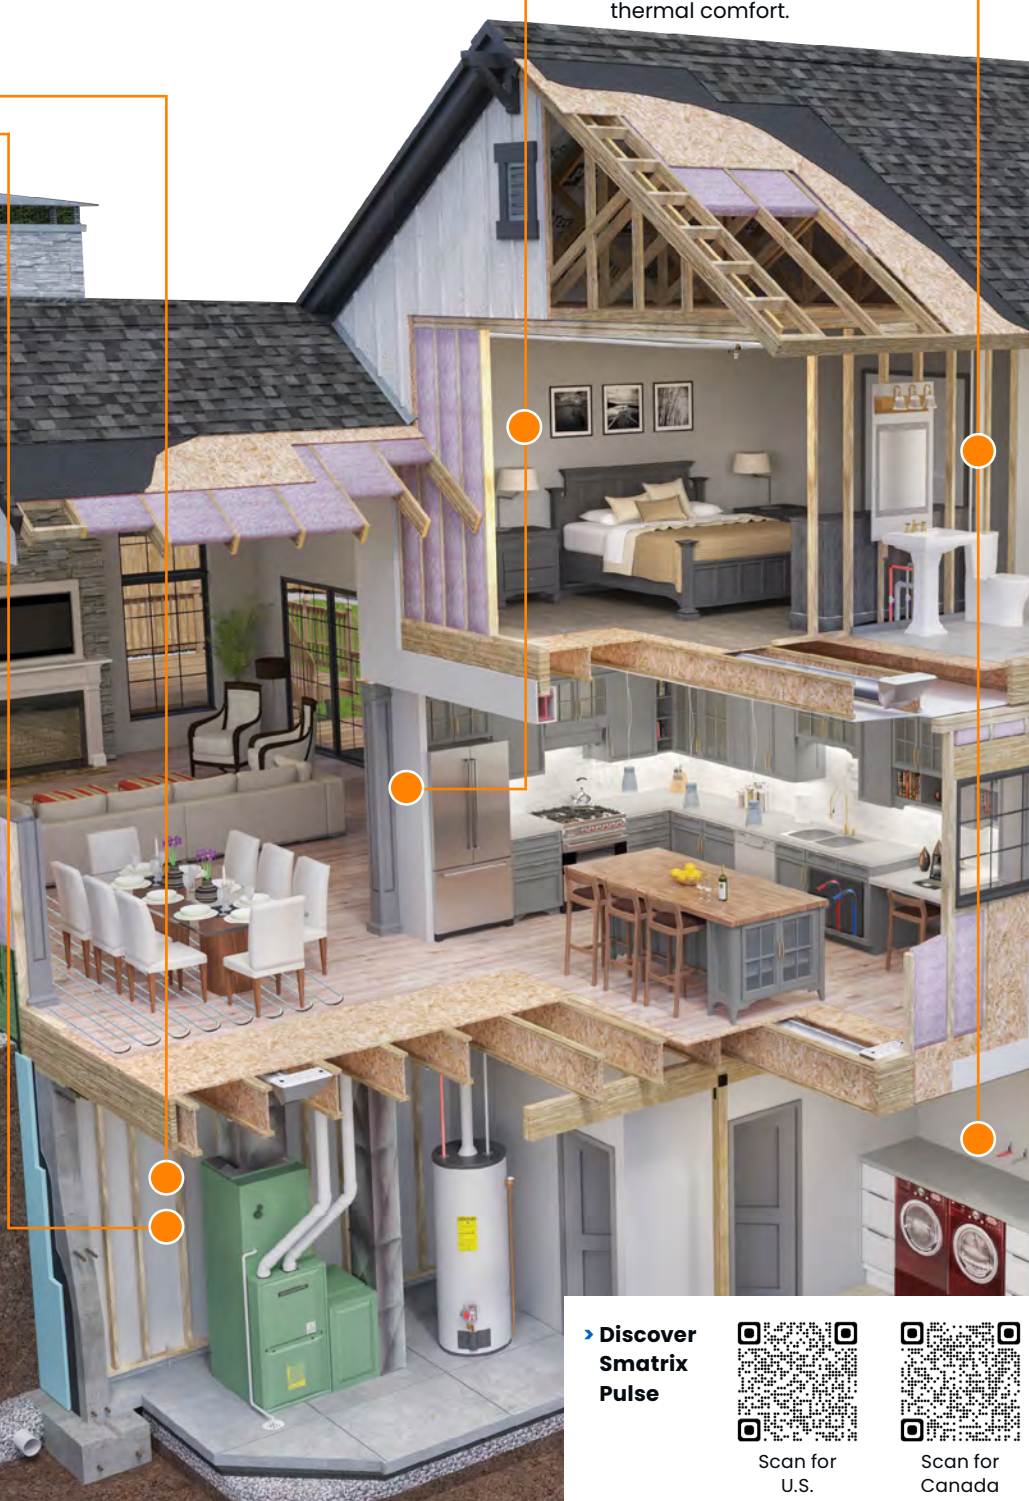

Mini Sensor

Ultra-precise, inconspicuous sensor with an operative temperature sensor to enable a more-precise measurement of thermal comfort.

For Expanded Coverage

The expansion module adds six more thermostats, eight more actuators, and one more remote relay to the controller.

The controller with antenna connects up to four controllers and expansion modules to increase system capacity up to 48 zones.
