

Tork Heavy Duty Cleaning Cloth, Giant Roll

530105

Think ahead.

Description

Tork Heavy-Duty Cleaning Cloth is a reusable, strong and absorbent multipurpose cloth especially for janitorial and industrial cleaning applications. This wiper can be used in either the Tork Floor or Wall Stand dispensers, which are designed for safety, efficiency and reliability. With the easy load and tear off features - you can dispense the amount of material needed with one hand. Compatible with most chemical solvents: Picks up and releases solvents more efficiently than textile products which reduces consumption. Heavy-Duty nonwoven - designed to protect your hands from heat and metal scraps. Reusable, strong, durable wiper. Excellent rental towel and rag replacement. excelCLEAN™ technology for a fast professional cleaning result.

- Its strong texture and high absorbency makes it ideal for removing oil, grease, lubricants and dirt
- Its strong texture and thickness delivers some protection for workers hands from heat and sharp objects
- Professional use
- Strong and absorbent
- Tough on dirt
- Efficient

Environmental Information

Raw materials

- Cellulose pulp
- Polyester
- Polypropylene
- Functional agents or additives

Cellulose Pulp

Cellulose pulp is produced either from softwood or hardwood coming from responsibly managed forests. The wood chips are boiled together with chemicals to remove the lignin between the fibers. The pulp is TCF (Totally Chlorine Free) or ECF (Elementary Chlorine Free) bleached in order to achieve a clean, bright and strong product, but also to increase the hygienic and absorbent qualities.

Polyester

Polyester fiber is produced from terephthalic acid and ethylene glycol, which react through condensation to polyester resin. The molten resin is spun to fibers through spinnerets and cooled with air. The fibers are then cut to intended fiber length.

Polypropylene

Polypropylene or polypropene is a thermoplastic polymer made from oil. The molten resin is spun to endless fibers through spinnerets and cooled by air. The fibers form a web.

Functional agents and additives

Functional additives could be wet strength agent, antistatic agent and wetting additives /tensides.

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes

Article creation date and latest article revision

Date of issue: 02-06-2020
