## DrainJet™ Hydraulic Drain Flushers Sizes: 1 3/8" to 6"

**Petersen® Drain Flushers open clogged drains with powerful jet action with backflow protection**

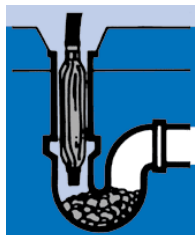

**Much greater flow rate than bulb-type flushers** that require much of the pressure just to expand the rubber. DrainJet™ Hydraulic Drain Flusher puts all the water flow and pressure to work. Effective within a wide water pressure range: 30 to 100 psi.

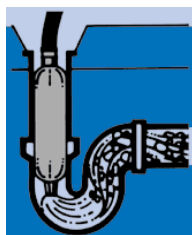

### Easy To Use:

1. Connect  
Flusher to  
water hose.

2. Insert  
Flusher into  
drain.

3. Turn on water.  
Flusher expands,  
locking in place, and  
flushes drain clear.

### DrainJet™ for the Professional

**DrainJet™ turns household water pressure into a powerful jet.** Flushing force and hydraulic action break through toughest obstructions.

**Flexibility:** The Petersen® Drain Flusher easily snakes around bends and elbows.

**Stiffener spring** (all models except 101-002) allows "snaking" around pipe bends.

**Tough professional quality construction:** Constructed of heavy duty specially treated reinforced industrial fabric for extra strength.

**Six models to fit every need:** Six heavy duty DrainJet™ models for drains from 1-3/8" - 6" diameter.

**Larger sizes:** Petersen's 107-Series Industrial Hydraulic Flushers are available for larger diameter pipelines.

### Economy Drain Flushers: Dr.FixIt / Econo

**Dr.FixIt economy Drain Flushers work on same principle as heavier duty DrainJet™.** Works well within 30 to 95 psi water pressure range.

**Two models fit all household needs:** Expandable, fast-acting Flushers fit all household drains from 1-3/8" through 6".

| Pipe Diameter   |         |       |     | Deflated Length |     | Brand Name | Shipping         |             | Item Number | Unit Price Each |
