

# HR-100

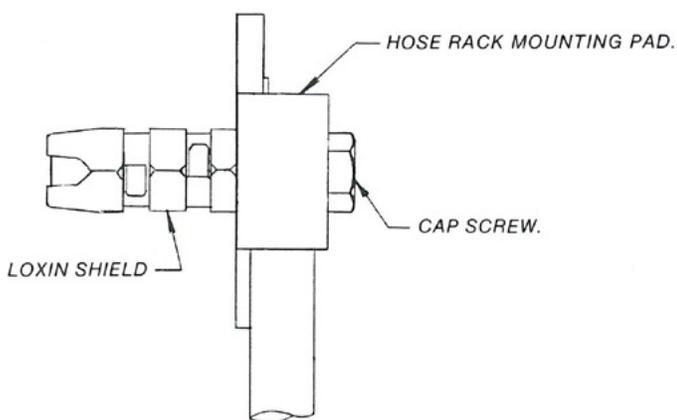

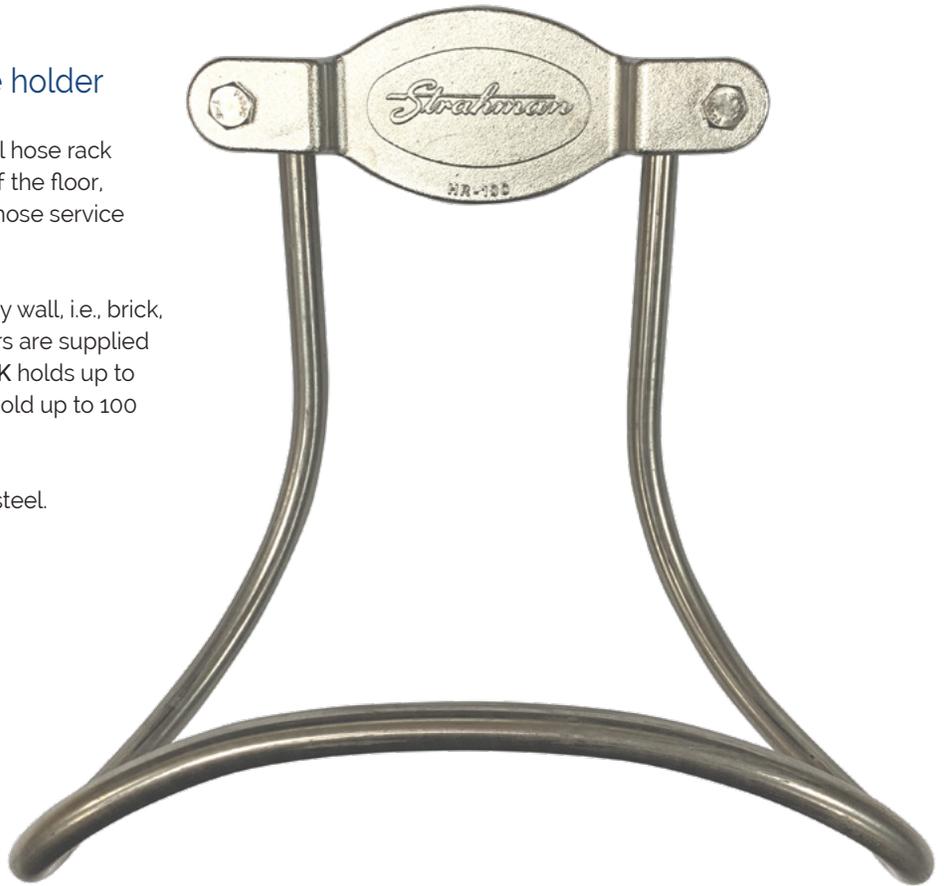

## Wall Mounted Hose Rack

### Heavy-duty gauge stainless steel hose holder

The **Strahman HR-100** is a good-looking yet practical hose rack designed to keep hoses neatly coiled in place and off the floor, maintaining a clean hose. This rack is ideal for water hose service when a water mixing hose station is unnecessary.

Installation is accessible on any conventional masonry wall, i.e., brick, tile, cement, or cinder block. Expanding metal anchors are supplied with the unit. Two models are available—the **HR100MK** holds up to 50 feet of Strahman hose, and the **HR100MK60** will hold up to 100 feet of Strahman hose.

The rack is constructed from heavy gauge stainless steel.

### Installation

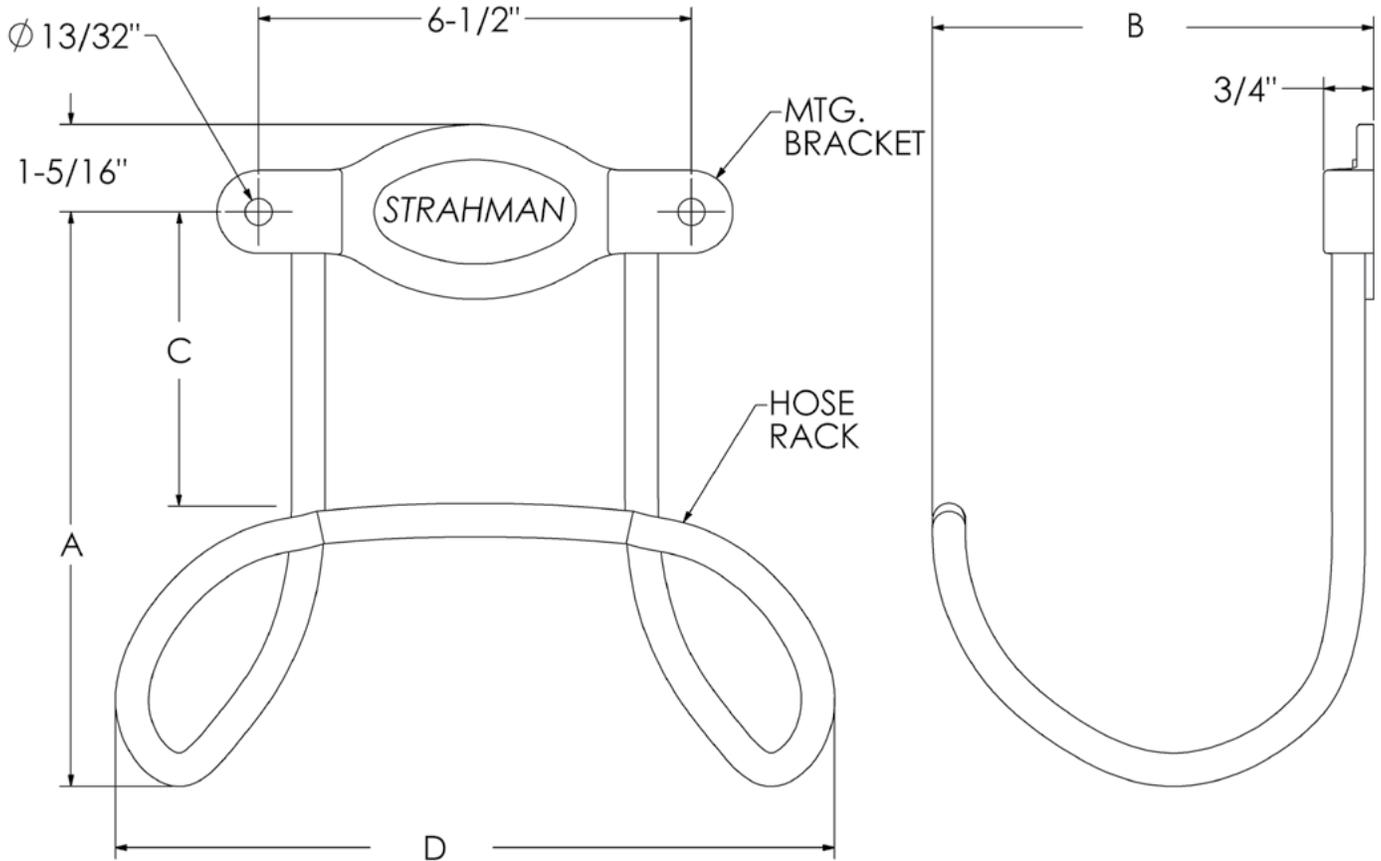

Using 5/8" Masonry Drill, drill two holes on a horizontal line made deep enough to admit the Loxin Shields. Insert Shields with nut end to back of hole and tighten screw until rack is securely fastened to wall.

Shown with a Strahman 25 foot Premium hose and M-70 spray gun, both sold separately.
