MANUAL HOOD adjustment settings detail

2 Position Hood Wiring Diagram

Unit transformer must have an additional 10 V.A. if not, optional transformer must be used.

IMPORTANT !
Unit transformer must have an additional 10 V.A. available. If not, an optional transformer must be used.

INSTRUCTIONS - Please read completely before starting installation

- 1.) Unpackage hood, panel and screw package.
- 2.) Caulk the back side of the hood flanges. Feed harness through the grommet in the duct cover panel (2 position only).
- 3.) Screw hood to duct cover panel.
- 4.) On down discharge application, remove cover panel over horizontal return opening.
- 5.) Install replacement cover panel over return opening and screw in place.
- 6.) On 2 position hoods, run harness through return chamber of unit and into control section.
Wire per diagram shown. Follow all local codes.
- 7.) On manual hood, adjust to desired opening as detailed.

In the horizontal application, the hood and screen section must be secured over a field cut opening in the side of the field supplied return air duct.

Downshot Application

Horizontal Application

(Cover panel is not used in horizontal application).
