MODEL 8102

HOT TAPPING SYSTEM

¾" - 2" NPT FOR STEEL/COPPER

The fast, easy way to drill holes from ¾" to 2" in active, pressurized steel and copper water lines.

MODEL 8102

HOT TAPPING SYSTEM $\frac{3}{4}$ " - 2" NPT FOR STEEL/COPPER

The best way to drill holes in pressurized water lines without having to shut the water off or drain the system down. The WHEELER-REX 8102 kit includes NPT adapters that will allow you to make $\frac{3}{4}$ " - 2" connections. Light weight and easy to use, all WHEELER-REX hot tap kits are hand operated and can be set-up and operated by one person. The unit can be easily assembled and disassembled and stores in a heavy-duty tool box that features foam inserts that will protect your tool during transportation and on the job site. Safe for water lines up to 250 PSI.

Please note the system attaches through a corporation stop and/or full-port ball valve and saddle on your pipe, WHEELER-REX does not provide stops or saddles
