PRO-SPRAY

Hunter®

JACK OF ALL SPRAYS

Residential or commercial? 30 PSI or 40 PSI? High efficiency or high performance? There's a Pro-Spray for that. Now expanded to three hard-working options, the Pro-Spray line offers everything you need for total customization for any challenging site. Need precision edges? Go for the Pro-Spray Fixed Arc nozzles. Demanding angles and curves? Choose the Pro Adjustable nozzles. Conservation-minded client? The MP Rotator is your answer. All models boast heavy-duty ABS construction, including an extra-thick body and cap, and exclusive body ribs for easier installation, service, and stability in loose soils. The sprinkler also features a user-friendly "pull-ring" flush cap to keep debris to a minimum and a multi-function wiper seal that eliminates flow-by.

PRO-SPRAY®

Ready for commercial or residential projects, the Pro-Spray is a rugged and reliable sprinkler for versatile applications. The contractor's choice for years, it was designed with the professional in mind.

Features and Benefits

Ratcheting riser for quick arc alignment

WARRANTY

Make adjustments while sprinkler is operating

02 Heavy-duty body and cap construction

Withstands the harshest environments with multithread buttress design

Pressure-activated, multifunction, no flow-by wiper seal

Permits easy removal and cleaning; treated with UV inhibitors to ensure long life

Compatible with all female threaded nozzles

Accepts adjustable, fixed, and specialty nozzles from Hunter and all major brands

05 Heavy-duty spring

Ensures positive retraction under any conditions

Optional factory-installed drain check valve for up to 10 feet elevation change

Eliminates landscape damage from flooding and erosion

1nnovative pop-top

Allows limited flow permitting controlled directional flushing

Pro-Spray and MP Rotator

Retrofit a system with MPs, and see water use reduced by 30 percent on average. Design a completely new system with them and realize even greater savings, all while grass stays green and landscapes look better than ever.

Around the world, cities and municipalities are recognizing the MP as not only a high performance sprinkler, but as a water conservation device, for beautiful, eco-minded landscapes.
