COLUMN HEADER INFORMATION

Each product column header label identifies the following product particulars:

Part Number	The number used to order that part.
Size	Nominal diameter of pipe with which the fitting is to be used. NOTE: Fittings may be same size (<i>only one size designation</i>) or reducing (<i>multiple sizes designated</i>).
Bag Quantity	The quantity of parts packaged in an individual bag.
Box Quantity	The total quantity of parts contained in individual boxes.
Price Each	The designated list price of the product.

PRODUCT CONFIGURATION

Each product group or configuration is headed by the product's name and abbreviated configuration description of the fitting outlet configuration. Configuration descriptions are defined on the following page. Line drawing illustrations are general representations of the fittings in the group, but may not be an exact depiction of all configurations listed. Line drawings are correlated to the configuration description. The drawing is read left to right for Elbow and Adapter configurations. Tees have an additional outlet branch and are read left to right (*run*) then top (*branch*). Drawings for Wyes and Crosses are read top to bottom then left to right and bushings drawings are read as outside x inside configuration. The configuration description also correlates to the size designation. As with nominal size designations, only the description is given when all outlets are the same. Reducing sizes list run configuration x branch configuration.
