ACCOR TECHNOLOGY, INC.

*Flow*Tite™
Valves, Risers, Connectors, Test Caps & Outlet Boxes

A Valve for all Reasons!

*Flow*Tite —The only stop valve that is code approved
to be installed on copper , CPVC, or PEX pipe and backed
by a written 10 year labor and material Warranty
One *Flow*Tite Valve* Fits All.

Patented PUSH◉ON® Technology

EPDM rubber seals

White High Performance™ riser

Superior hydraulic stainless steel crimps

No stick push/pull handle operation

Two internal stainless steel gripper rings and EPDM o'ring seals
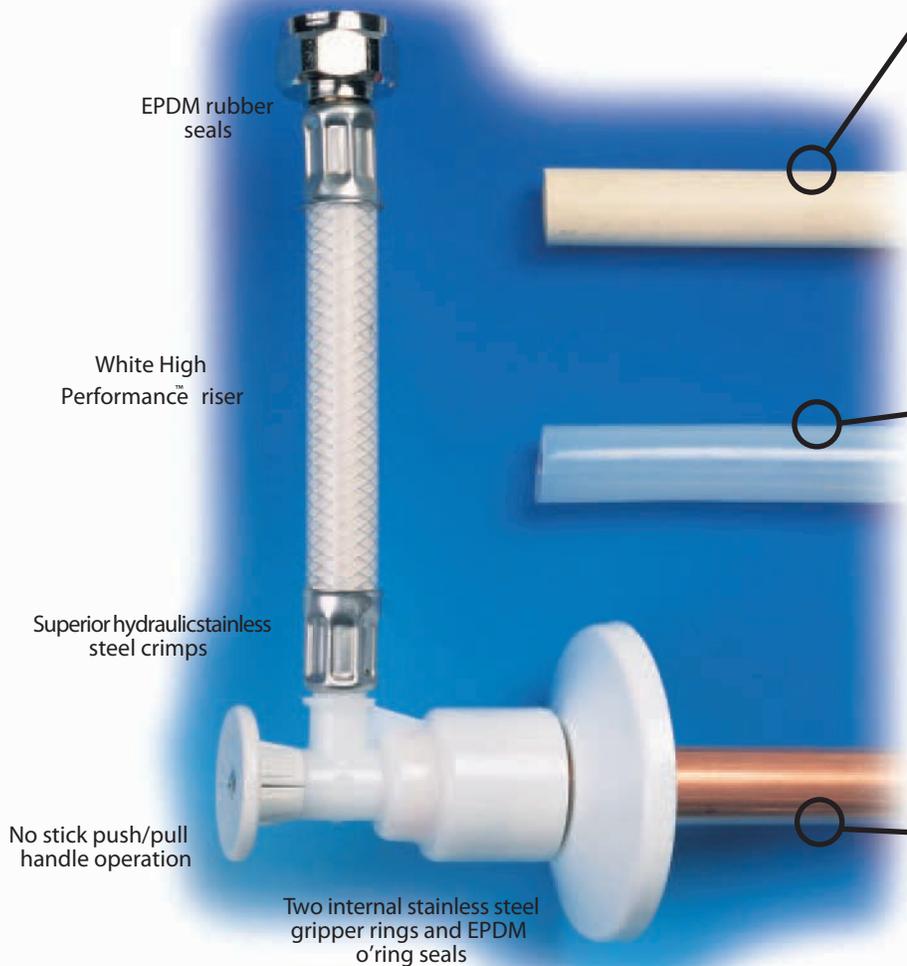

CPVC PIPE

• Eliminate expensive, messy, glue-on valve adapters.

• Eliminate dissimilar material or overtightening warnings.

• No Teflon tape requirements.

• Internal stainless gripper teeth and o'ring move with thermal expansion and contraction of pipe.

PEX PIPE

• No leaking barb valve crimps by eliminating tool adjustments and crimping in tight places.

• "Dual" internal stainless rings with more hydraulic strength than the pipe.

• No copper stub outs.

COPPER PIPE

• *Flow*Tite code approved and installed on copper since 1988.

• No leaking compression fittings, soldering, or packing nut adjustments.

• No permanent pipe damage from brass ferrule. *Flow*Tite is removable and reusable.

PATENTED Patented worldwide with additional patents pending.

CERTIFICATION LISTINGS

file number 2657

NSF 61/9 certified

ACCOR TECHNOLOGY, INC.

**Model X (with dual internal stainless gripper rings!)*

Worldwide Patented PushOn Technology

Founded in Bellevue Washington in 1987, Accor Technology set out to make the next generation plumbing connection. After all, there was no reason why the plumbing market couldn't experience the same change and innovation seen in many US industries.

The ubiquitous angle stop valve has had minimal changes since it's inception over 50 years ago until Accor Technology designed and marketed its worldwide-patented **PushOn** technology in 1988. During the development of the *Flow*Tite angle stop valve, the company interviewed numerous plumbing contractors and builders asking one simple question. What problems do you experience with the old metal stop valves and risers?

The answer was a list that included: leaking packing seals, compression nuts requiring adjustments and difficulty attaching risers in tight places— all resulting in plumber and builder callbacks with little, if any, warranty protection.

Easy to use one-piece flexible faucet and dishwasher connectors eliminates leaking from copper fitting and tubing adjustments.

Innovative Product Design

Accor designed its patented **PushOn** technology to overcome common problems associated with compression style valves. The unique o'ring design of *Flow*Tite eliminates packing seal leaks, and compression problems. The internal stainless steel gripper ring mechanically attaches to the pipe without tools, and is tested to over 1000 psi. The valves and couplings are removable by twisting off counterclockwise, and are reusable.

Original One Piece Valve and Flexible Connector System

Accor's patented **PushOn** technology makes its *Flow*Tite valve the easiest and fastest valve and connector system to install. The design of the valve made it logical to attach the flexible connector in the factory. This "original one-piece" valve and flexible connector eliminates leaking field joints and human error providing a trouble free system. Years of in field experience has perfected our hydraulic stainless steel crimps, and High Performance™ connector construction.

Clean, White and Certified Health Safe

Accor's innovative design eliminates internal and external corrosion while introducing a clean, white look for today's homes. *Flow*Tite is certified to health standards requested by the EPA and adopted by ANSI.

National Code Acceptance

*Flow*Tite stop valves have more plumbing code listings than any other valve on the market – including IAPMO, ICC-ES, NSF 61/9, Warnock Hersey and other local codes. Valves are manufactured in accordance with ANSI-A112.18.1M, ANSI-NSF61, CAN-CSA B125 and meet requirements of UPC, IPC, and CSA. See page 21 for specific product listing information.

Proven Quality Since 1988

Accor Technology has proven reliability and a solid track record with millions of valves installed since 1988. Our unique 10-year labor and material warranty ensures dedication to quality control. The proven patented **PushOn** technology and the people that manufacture it, make Accor a company that you can trust.

Design Margin of Safety

The design criteria for all Accor's products have a high margin of safety well beyond the standards, backed with the strongest warranty in the business. Accor has been manufacturing its patented PushOn technology in its Wenatchee, WA plant since 1988.

Engineered for Leak Free Performance

State of the art injection molding.

Intermittent shock testing
(125psi - 180psi, 140°F, 30,000+ cycles).

High Tech Manufacturing

State of the art injection molding and polymer material design allow Accor to improve the performance of its valves and couplings as compared to its metal counterparts.

MADE IN
USA

Computerized welding monitors each valve.
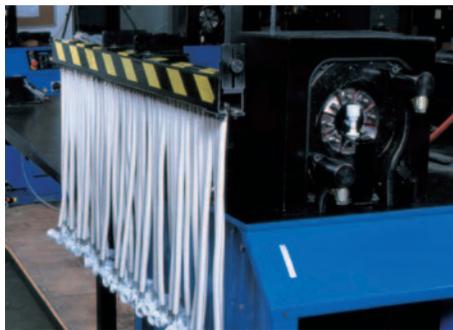

Hydraulic crimping machines.

Daily hydrostatic testing
(shows 1400psi-actual pressure).

Quality Control to Back Our Warranty

The focus of our production team is to provide the highest quality control that affords Accor Technology to offer it's unique 10-year labor and material warranty.
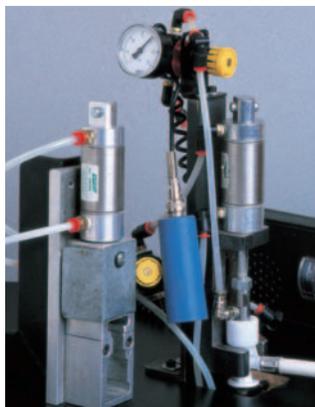

Production air testing with ultrasonic leak detectors.

*Flow*Tite Terms and Conditions

Freight

Full freight prepaid on $1,500 (net) of assorted Accor merchandise including all FlowTite products to one destination within the 48 contiguous United States. We reserve the right to ship via most economical way and by lowest approved freight classification. Orders will be shipped from Wenatchee, Washington.

General

All discounts are for orders shipped to one destination.

Prices

All prices subject to change without notice. Orders will be invoiced at prices at time of shipment. A 5% surcharge will be added to orders of less than carton quantity.*

Returns

Any return of any products must be approved by Accor Technology, Inc. and issued a Return Goods Authorization number (RGA). Absolutely no returns will be accepted or replaced without an RGA#. Accor reserves the right to deny any RGA request of non-defective product. Approved requests will include a service charge of 25% of the net purchased price of the goods plus all transportation expenses. Loss and/or damage claims must be reported within 5 days of receipt of order. Material returned with our consent will be replaced less the value of the freight and 25% handling charge.

Terms

Payment terms: 2% - 10th prox net 30.

Past due invoices will be subject to a service charge of 2% per month (or maximum rate allowed by law, whichever is less.)

* Carton quantities as shown on Full Line Price Catalog.

New *Flow*Tite
Icemaker Box

Accor's round FlowTite icemaker box, with integral one-piece valve and factory applied 7' flexible connector, eliminates callbacks and costly floor damage. This unique design prevents crooked installations and the protective cover at rough in maintains the clean, white look (patent pending).

LIMITED 10 YEAR WARRANTY

The "core" of Accor Technology is found in its patented **PushOn** technology. The company, which started making the best angle stop over 12 years ago, has expanded its coupling technology to connectors, test caps, and ice maker boxes. New product introductions will continue with the same objective—a clean, modern look that is easily installed and superior in long term performance!

Thank you for choosing Accor's products!
