

IPS White Plastic Shallow Escutcheon, Bag of 50

Job Name	_____
Location	_____
Engineer	_____
Contractor	_____
Tag	_____ PO# _____

Specifications

Jones Stephens' escutcheons are used to cover holes in the wall from water supply lines. The flange is white in color and provides a value option where the plumbing is not exposed and a decorative finish is not desired. Constructed of plastic, this IPS escutcheon plate is designed to be long-lasting and corrosion free.

Applications

Jones Stephens' escutcheons are approved for use with commercial and residential potable and non-potable water applications.

Materials

Plastic
