Spill Containment Cart and Pallet, 30 Gallon Capacity - 1637

Product Images

Short Description

- Ideal for safe transfer of containers between workstations
- 30-gallon spill capacity
- 2000 lbs. load capacity
- High performance HDPE construction provides excellent durability and chemical resistance

Description

Designed to safely transfer containers between workstations, while containing spills and preventing hazardous substances from spreading, the Eagle Spill Containment Cart and Pallet, model 1637, provides the safety of a spill platform along with the convenience of mobility. This exceptional spill containment cart can handle loads of up to 2000 lbs.

With a 30-gallon capacity, the mobile spill containment cart provides ample storage space for containing spills of various sizes. The versatile system combines a sturdy steel cart with four casters with a 2-drum spill containment modular platform constructed using high-quality engineered plastic materials that resist corrosion, ensuring long-lasting, durable performance even in demanding environments.

The user-friendly features of the mobile spill containment station model 1637 further enhance its practicality. Equipped with a removable grate, it facilitates easy cleaning and maintenance, ensuring swift recovery from spills. Additionally, the integrated forklift pockets allow for convenient transportation and placement, maximizing efficiency and productivity.

Note: The product contains the spill pallet and cart only; drums are sold separately.

Specifications
