Short Description

- Extra-deep design supports door-mounted storage and full capacity for bulk containers and safety cans.
- Provides up to 28% more storage than standard cabinets.
- Customizable door attachments organize aerosols, spray bottles, caulk tubes, and small canisters for fast access.
- Door-mounted storage increases shelf space and streamlines workflow.
- Fully compliant with OSHA, NFPA 30, IFC, and FM approved for flammable liquids.
- Optional skid leg and tower leg kits for flexible installation.

Description

Utili-Guard+ Flammable Safety Cabinets – Advanced Space, Safety, and Organization

Upgrade your hazardous material storage with the Justrite Utili-Guard+ 30-gallon flammable safety cabinet (model U893020), designed for advanced safety, space efficiency, and streamlined organization. This yellow cabinet is ideal for modern facilities seeking greater capacity and flexible storage in a compact footprint.

The Utili-Guard+ 30-gallon flammable safety cabinet features two self-closing doors, double-wall steel construction, one shelf, and two door-mounted attachments: one spray bottle holder and one aerosol can holder. These features offer instant access and visibility for your most-used materials while providing up to 28% more storage compared to standard flammable cabinets. The deep interior design helps recover valuable floor space and may replace two smaller cabinets in your operation.

For customization, each door on the Utili-Guard+ 30-gallon flammable safety cabinet supports up to two modular attachments at a time. Select from extra [spray bottle holders](#), [aerosol can holders](#), [caulk tube attachments](#), and [tray attachments](#) to organize frequently used items. You can order additional accessories for replacement or future needs, but only two attachments per door may be used at once. Optional [tower leg kits](#) and [skid leg kits](#) are also available for flexible installation and mobility.

When used properly as designed, safety cabinets with self-closing doors shut automatically in case of a fire. The self-closing doors, under tension, are held open by using fusible links. Under fire conditions, when the ambient temperature reaches 165 F (74 C), the links melt and the safety cabinet's self-closing doors automatically swing shut. The self-latching system engages with three stainless steel bullet-slams located at the top, bottom, and center locations of the door. For replacement fusible links, order model [29988](#).

Built for compliance and peace of mind, every Utili-Guard+ flammable safety cabinet is FM approved, OSHA, NFPA 30, and IFC compliant. Key features include advanced flame arresters, a leakproof two-inch containment sump for spill control, soft-close mechanisms, reflective heavy-duty safety labels, and grounding protection. Made in the USA, each cabinet is backed by a 10-year warranty for lasting reliability.

Begin by choosing your base Utili-Guard+ flammable safety cabinet size, then select the modular door attachments and leg options best suited to your workflow. Accessories can be easily added, removed, or swapped as your storage needs evolve.

Experience smarter storage, enhanced protection, and greater efficiency with Justrite Utili-Guard+ flammable safety cabinets.
