

FOR ALL E1 AND E2 STYLE HARD HATS

FIBRE-METAL

UNION MADE IN USA

THE FIBRE-METAL PRODUCTS CO., CONCORDVILLE, PA 19331

WARNING

This cap provides limited head protection from blows to the top of the head as specified in ANSI Z89.1 Standard. It does not provide the same degree of protection from blows to the front, sides or rear of the cap. For lateral impact protection use Fibre-Metal SE-2 caps. Some hazards may exceed the caps ability to protect. Avoid severe hazard areas. Protective caps can be damaged. Do not abuse, throw or drop. Components should be inspected daily and replaced immediately if there is any sign of damage, wear or degradation. Do not alter or modify the shell or suspension system. Do not paint, imprint or apply decals without the written permission of Fibre-Metal. Do not clean with solvents, or chemicals. Use only mild soap and warm water. Do not store or carry on the rear window shelf of a vehicle. Excessive sunlight and extreme heat may degrade protective performance along with any imprint or full graphic on the cap. Use only Fibre-Metal replacement parts and accessories. Adjust and wear the cap properly. **Failure to heed warnings could result in injury or death.** 8-03
