

# Flexible Semi-Rigid Aluminum Ducting

Job Name	_____
Location	_____
Engineer	_____
Contractor	_____
Tag	_____ PO# _____

## Specifications

Jones Stephens' Flexible Semi-Rigid Aluminum Ducting is 100% aluminum. The duct is non-combustible, making it ideal for hot exhaust. Bendable to any configuration, this product features a triple-lock design for added durability. Made in the USA to meet Jones Stephens' highest quality standards, the Flexible Semi-Rigid Aluminum Ducting has a maximum operating temperature of 400°F and is Class 0 (flame spread and fire development indexes of zero).

## Applications

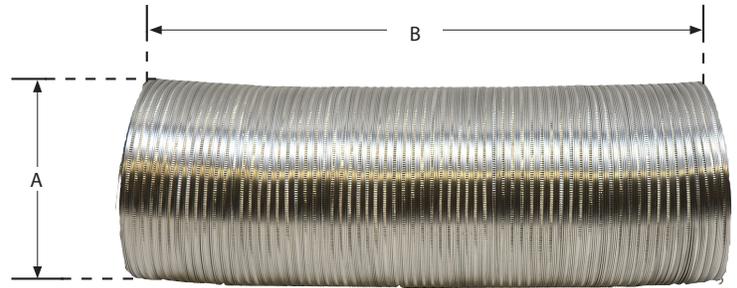

Jones Stephens' Flexible Semi-Rigid Aluminum Ducting can be used wherever building codes require the use of all-aluminum semi-rigid ducting.

## Materials

Aluminum
