

Certifications & Standards:

Tested & Certified to ASTM C 1461
Tested & Certified to ASTM C 1440
IAPMO File 3251

100% Made in USA

Material Specifications:

Clamp: Type 301 AISI stainless steel

Screw: Type 301 AISI stainless steel

Gasket: A thermoplastic Exxon Chemical (Santoprene) 101-87

Rigid Quik Slip-On Couplings:

The Rigid Quik Slip-On Coupling is a simplified coupling for joining various types of piping materials and diameters for a drain, waste, and vent (DWV) system.

Simplified Design:

The Rigid Quik Slip-On Coupling DOES NOT require disassembly prior to assembly of the joint.

The Rigid Quik Slip-On Coupling DOES NOT require the gasket to be stretched over the pipe or fitting.

The Rigid Quik Slip-On Coupling DOES NOT need threaded cast iron fitting to make a transition to a different piping material.

Installation Benefits:

The Rigid Quik Slip-On Coupling allows the plumbing contractor to:

Rotate each clamp independently around the gasket in order to facilitate easy assembly.

Apply either side of a coupling to a pipe or a fitting and to completely tighten to 60 inch-lbs without affecting the opposite side of the coupling.

Complete a joint in 1/2 the time of traditional couplings.

Make a tight, long-lasting seal.

RIGID QUIK

Code #	Size/Description
6010	1-1/2 CI, Plastic-1-1/4 Copper
6011	1-1/2 CI, Plastic-1 1/2 CI Plastic
6012	1-1/2 CI, Plastic-1 1/2 Copper, 1 1/4 Plastic
6020	2 CI Plastic - 1 1/4 Copper
