## Knurled Nut

The knurled nut is used with fittings where applications of a finger tight assembly is acceptable. Common applications include, but are not limited to, low pressure laboratory use on plastic tubing.

Knurled nuts are available in the same sizes as shown for CBC-Lok® nuts (DN). The knurled nut part descriptor is DKN. For example, the part number for a 1/2" knurled nut is SS-DKN-8.
