

## Instructions for Using PL1438 $1^1/2^{\prime\prime}$ & PL1750 2" PVC Shell Cutters with Reed Hole Saw Adapter on the DM2000

Note:

- 1. Do not use pilot when drilling PVC pipe.
- 2. Do not overfeed shell cutters into PVC pipe.
- For better wear, use tapping compound (#98425) on the cutting tips and the outside of the shell cutter.

Hole Saw Spacer (#113 "O" Ring .56"ID x .75"OD x 3/32). This end screws into the threaded end installed between saw and arbor of the machine boring bar. Arbor Body Driver PVC Shell Cutter - Screw onto arbor body to the

o-ring and line up pin holes for the driver pins.
