## Prevent Acid in New A2L & HFO Equipment

**Prevents Acid by 3X!**

### ACID REMOVAL TEST IN R-454B AND POE OIL

The addition of Rx-Acid Scavenger in samples of R-454B, POE oil and moisture was proven to prevent acid formation nearly 3X better than samples without Rx-Acid Scavenger using ANSI/ASHRAE 97 2007 (RA 2017) Sealed Glass Tube Method.

### HFO AND A2L COMPATIBILITY TESTING

Rx-Acid Scavenger has been rigorously tested to confirm compatibility with all commercially available HFO and A2L refrigerants with POE oil using ANSI/ASHRAE Standard 172-2017.
