Carson Specification Grade

Carson Spec line meets or exceeds your engineering specification needs. it is the most complete line of irrigation grade level access boxes for golf, parks, commercial and residential properties for over 42 years. Carson Spec valve boxes are the strongest and best performing products of their kind, and are specified and preferred worldwide.

0809 Round

Carson Spec 8" line of valve boxes meet any of your engineering specification needs.

Highlights

- Rigid side walls
- Structural foam manufacturing process
- Perfect for turf applications
- HDPE (high-density polyethylene) construction
- Snap tight lid
- Lid finger hole
- Ultra-Violet (UV) inhibitors
- Made in the USA

1730 Super Jumbo Rectangular XL

Oldcastle Access Boxes are by far the broadest and most complete line offered in the industry. Innovation and uniqueness were the key drivers in the design of the HDPE 1730-12, 1730-18 and 1730-24 access boxes. Our 1730-24 is designed to withstand close to twice the side loads compared to our already robust 1730-18 including an increased interior volume. The 1730 vaults have a variety of excellent features.

Highlights

- Drop-N-Lock available
- Lid interchangeability with Western Underground
- Our 1730-24 has greater storage capacity than the other straight wall 2436
- Ultra violet inhibitors
- Green, Gray and Black colors
- Made in the U.S.A

Oldcastle Access Boxes are by far the broadest and most complete line offered in the industry. Polyethylene construction wall design of our 2436, allows for field modifications for up to 6" pipe with conventional tools without compromising strength.

Highlights

- Lightweight alternative to polymer concrete and concrete boxes
- 5,000 lb-load rating
- Flared design for higher internal area and strength versus straight wall design
- Galvanized steel reinforcement loop braces available
- Polymer concrete lids/covers available for increased load performance
- Multiple depths
- Made in the U.S.A.

2448

Oldcastle Access Boxes are by far the broadest and most complete line offered in the industry. Polyethylene construction wall design of our 2448, allows for field modifications for up to 6" pipe with conventional tools without compromising strength.

Highlights

- Lightweight alternative to polymer concrete and concrete boxes
- 5,000 lb-load rating
- Flared design for higher internal area and strength versus straight wall design
- Galvanized steel reinforcement loop braces available
- Polymer concrete lids/covers available for increased load performance
- Multiple depths
- Made in the U.S.A.

Not available as a separate unit.

Body extension is for increased depth as a full factory assembled unit only.

Polymer Concrete

H-Series

H-SERIES™ Polymer Concrete has exceptional strength, rigidity along with being lighter than concrete. Our polymer concrete is a blend of graded aggregates in combination with a proprietary mix of the finest polymer resins available, we then add chopped fiberglass for increased reinforcement. Sizes range from 11"x11" to 36"x 60" with up to ASHTO H-20 performance rating.

0910 Heavy Duty Round

910 H-Series is designed to withstand H-10 and H-20 loading in incidental and non-deliberate traffic areas. Not intended to be installed in roadways. Compliant with AASHTO H-10 Design Load; ASTM C 857-95 Design Load of A-8, 8,000 lbs.

Highlights

- Prox 30% lighter than concrete
- Chip & crack resistant
- Alkaline, acid, and weather resistant
- Various lock options
- Made in USA

Irrigation

Polymer Concrete

H-Series

2436 Heavy Duty

2436 H-Series is designed to withstand H-10 and H-20 loading in incidental and non-deliberate traffic areas. Compliant with AASHTO H-10 Design Load; ASTM C 857-95 Design Load of A-8, 8,000 lbs.

Highlights

- Prox 30% lighter than concrete
- Chip & crack resistant
- Alkaline, acid, and weather resistant
- Various lock options
- Made in USA

Oldcastle Precast Enclosure Solutions

Load Rating Equivalency Chart

AASHTO, Standard Specifications for Highway Bridges & ASTM C 857 Standard Practice for Minimum Structural Design Loading, agree that: 'the maximum single wheel load cannot exceed 40% of the GVWR'

Example Mower* = GVW 432 lbs

Example Mower* Wheel Load = 173 lbs/each

Actual GVW of mowers and wheel loads will vary by brand, model, style and options.
Check your mower manual for correct load ratings based on your mower.

*Example mower does not accurately reflect any specific brand or model of mower. Illustration and GVW/Wheel Loads are used for example only.

Class Vehicle	Performance Category	GVW	Wheel Load	Design Load	Minimum Failure (Test Load)	
					ANSI SCTE	AASHTO ASTM
Passenger Car	Pedestrian	6000	2400		3000	
Light Duty Truck; 1 - 2	Tier 5	10000	4000	5000	7500	
Medium Duty Truck; 3 - 5	H 10 / A-8 / Tier 8	19500	7800	8000	12000	22560
Heavy Duty Truck; 6 - 7		26000	10400			
	Tier 15	33000	13200	15000		
Tractor Truck; >8	HS 20 / A-16	40000	16000	16000		
	Tier 22			22500		

ACTUAL LOAD RATING IS DETERMINED BY THE BOX AND COVER COMBINATION

Customer service is available to assist in determining the correct product based on load requirements. However, the customer is responsible for final choice of box/lid configuration.

The Rural Utility Service (RUS) is a department of the US Department of Agriculture organized to facilitate rural developments. You will find Carson and Synertech brand enclosures listed by the RUS. Please reference brand specific product data sheets for additional clarifications. All Carson brand enclosures conform to the RUS "Tamper Resistant" fastener design for buried pedestals. Visit www.usda.gov/rus/telecom/index.htm for more information on the RUS.

¹ The "Test Load" term is used in ANSI/ SCTE 77-2007 to designate the minimum load that an enclosure must be able to sustain to qualify for a particular performance rating. The term is synonymous with (minimum) Failure Load. It should be noted that within the ANSI/ SCTE 77-2007 specification, the "Test Load is 1.5 x the Design Load. Some specifications and Operating Companies select a higher multiple or Safety Factor for Proof of Design Load. For example, ASTM C497 specifies 2.17 time the Design Load.

- Light Duty : Pedestrian/Greenbelt
- Medium Duty : Incidental, Non-deliberate Traffic
- Heavy Duty : Incidental, Non-deliberate Traffic
- Traffic : Continuous Roadway Traffic
