Class 300 Class 300

Model 782

Model 782-WE

Typical Service

- Used extensively to strain foreign matter from pipelines and provide economical protection for costly pumps, meters, valves, and other similar mechanical equipment.
- Especially important where weld debris is likely present in the pipeline.
- Well suited for long service in high pressure and temperature applications.

Features

 Machined seats in both body and cap align and lock the screen in place to stop sediment bypass. Machined seats facilitate alignment and accurate reseating after servicing.

Construction

- Designed for Class 300 specifications.
- Heavy gauge reinforced screens are used.
- IMPORTANT NOTE:
 - Model 782-WE ends are machined to match Schedule 40 pipe.
 - Other connections are available, consult factory.

Self-Cleaning

• Self-cleaning is accomplished by opening the plug or valve connected to the blowoff outlet.

Blowoff Outlets

- Blowoff outlets are NPT tapped at location C. See next page for NPT sizes.
- Blind covers are available, consult factory.

Capacity

- Generously proportioned bodies.
- Open Area Ratio much greater than pipe size, ensuring low pressure drop.
