STANDON ADJUSTABLE PIPE SUPPORTS

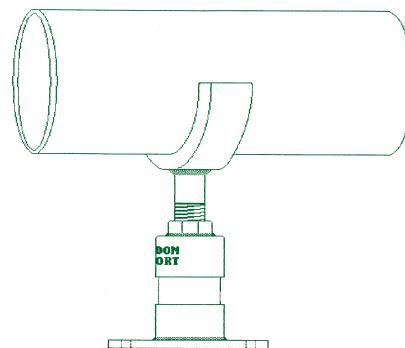

Standon Model S92 Saddle Support

The Standon Model S92 Saddle Support was specifically designed to fit your pipe! A nearly 50% circumferential cradle (170°), and a pipe-to-saddle gap clearance of less than .125" guarantees excellent performance.

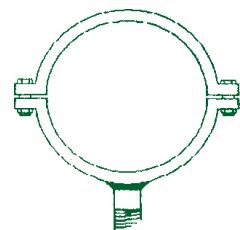

The Standon Saddle Support comes with an oversized base and an adjustable collar allowing up to 3" of fine adjustment.

The Standon Saddle Support is offered in a variety of metals and sizes. Because corrosion is a concern, we offer a galvanized finish. Better yet - try our 100% 304 stainless steel version.

Packaged in an easily inventoried box, the Standon Saddle Support is always ready to do the job. An installation guide is included with each Support. The customer supplies the course extension pipe (size is determined by the size of the support being used). The extension pipe should be field cut to the length required. No threading is needed. The collar and base cups are sized to accept standard sizes of iron pipe. Schedule 40 is the minimum thickness recommended.

The Standon model C92 is a two piece, full circle saddle clamp. It comes supplied with two bolts and nuts to retain the matching top saddle.

INSTALLATION -

To insure proper Support performance and stability; After final height adjustment is attained, apply tack welds to both support cups and extension pipe. Use E70XX electrode for welds. The base plate should be anchored to the floor with removable anchor bolts. If re-adjustment is required at a later date, remove anchor bolts and rotate entire lower unit using collar nut. Re-anchor base plate.
