

Fan Blower Control Boards

Electronic Fan Blower Control Board

- Designed for use in heating and cooling equipment
- Controls the operation of the induced draft blower and the circulating blower in all thermostat modes
- Delay time: 60 seconds

Universal Electronic Fan Timer

- Integrate control of combustion blower and circulating fan operations in a gas warm air appliance
- Central appliance wiring point simplifies appliance assembly and service
- Monitors thermostat for heat, cool and fan demands, runs the induced draft blower motor and runs the circulating fan (up to two speeds) as needed. It also monitors limit switch strings and energizes ignition control.
- Features a replaceable fuse and DIP switch, diagnostic LED and continuous EAC & HUM terminal connections
- Ambient Temperature Range: -40 to 79C (-40 to 175F)
