

## Using the hood controls.

Throughout this manual, features and appearance may vary from your model.

### Control Knobs (on some models)

#### 1 FAN Control

Turn to **LO**, **MED**, **HI** or **MAX** as needed.

Continuous use of the fan system while cooking helps keep the kitchen comfortable and less humid. It also reduces cooking odors and soiling moisture that create a frequent need for cleaning.

#### 2 LIGHT Control

Turn to **HI** while cooking or to **NITE** for use as a night light.

### Rocker Switch Controls (on some models)

#### 1 FAN Control

Press the rocker switch at the top to turn the fan on **HI** and at the bottom to turn it on **LOW**. The center position is **OFF**.

Continuous use of the fan system while cooking helps keep the kitchen comfortable and less humid. It also reduces cooking odors and soiling moisture that create a frequent need for cleaning.

#### 2 LIGHT Control

Press the rocker switch at the top to turn the light **ON** while cooking. Press the rocker switch at the bottom for use as a night light. The center position is **OFF**.

## Care and cleaning of the vent hood.

Be sure electrical power is off and all surfaces are cool before cleaning or servicing any part of the vent hood.

If it ever becomes necessary to replace the metal grease filters, they may be ordered from your GE supplier.

### Reusable Metal Grease Filters

The hood has 2 metal reusable grease filters.

The metal filters trap grease released by foods on the cooktop. They also help prevent flaming foods on the cooktop from damaging the inside of the hood.

For this reason, the filters must **ALWAYS** be in place when the hood is used. The grease filters should be cleaned once a month, or as needed.

To remove, press the filter locks back and pull the filters down and out.

To replace, insert the rear filter tabs in the frame slots at the back of the opening. Push the filters up and lock them into place.

To clean the grease filters, soak them and then swish them around in hot water and detergent. Don't use ammonia or ammonia products because they will darken the metal. Do not use abrasives or oven cleaners. Light brushing can be used to remove embedded dirt. Rinse, shake and let them dry before replacing. They may also be cleaned in an automatic dishwasher.

**NOTE:** Before cleaning, make sure the charcoal filters, if present, are unclipped and removed. See the Charcoal Filters section.

# Care and cleaning of the vent hood.

GEAppliances.com

The charcoal filters are clipped inside of each reusable metal grease filter.

## Charcoal Filters (on some models)

**The charcoal filters cannot be cleaned. They must be replaced.**

For 30" hood models, order Kit no. WB02X10707.

For 36" hood models, order Kit no. WB02X10708.

These kits can be ordered from your GE supplier.

**NOTE:** Charcoal filters are **not** included with the hood. They must be ordered from your GE supplier.

If the model is not vented to the outside, the air will be recirculated through disposable charcoal filters that help remove smoke and odors.

The charcoal filters should be replaced when they are noticeably dirty or discolored (usually after 6–12 months, depending on hood usage).

**NOTE:** DO NOT rinse, or put charcoal filters in an automatic dishwasher.

## Painted Surfaces (on some models)

To clean the hood surface, use a hot, damp cloth with a mild detergent suitable for painted surfaces. Use a clean, hot, damp cloth to remove soap. Dry with a dry, clean cloth.

Do not use steel-wool pads or other abrasive cleaners. They will scratch the surface. Wipe with a clean, hot, damp cloth after using cleansers.

## Stainless Steel Surfaces (on some models)

**Do not use a steel wool pad; it will scratch the surface.**

To clean the stainless steel surface, use warm sudsy water or a stainless steel cleaner or polish. Always wipe the surface in the direction of the grain. Follow the cleaner instructions for cleaning the stainless steel surface.

To inquire about purchasing stainless steel appliance cleaner or polish, or to find the location of a dealer nearest you, please call our toll-free number:

## Hood Lights

This hood requires two bulbs (not included), maximum 50 watts.

Purchase and install PAR20, 50 W Maximum halogen bulbs.

When replacing a bulb, let it cool first. Make sure that power to the light has been turned off. Never allow a hot bulb to come into contact with water.

**⚠ WARNING:** To reduce the risk of electric shock, do not connect electrical power to the hood without both bulbs in place.

To change the light bulbs:

- 1 Grasp the bulb on the edges and unscrew it.
- 2 Replace with the same size bulb.

## ⚠ CAUTION:

- Do not touch the hood light bulbs when they are on. They may be hot enough to cause injury.
- The light bulbs operate at extremely high temperatures. If they shatter, the hot glass could cause personal injury.
