

SELFEED BITS

OVERVIEW

MILWAUKEE® Selffeed Drill Bits deliver speed and endurance for repetitive drilling of large holes. Designed for any trade that demands wood cutting for installing pipe and conduit, Selffeed bits feed into work without pressure and provide faster boring of clean, accurate holes. The bits have improved balance with reduced runout, while the hex shank provides a secure gripping surface for the drill chuck. Every MILWAUKEE® Selffeed Drill Bit is coated with a rust inhibitor. Built to last and designed to perform, these Selffeed Bits are resharpenable so you can keep them cutting like new. Two feed screws are included.

FEATURES

- **Faster, More Accurate Drilling:** Center feed screw pilots the bit and allows the bit to pull through fast
- **Clean Holes:** Inside cutting plane shaves the hole radius for clean, smooth holes without pressure
- **Long-lasting Performance:** Bits are resharpenable and include two removable, replaceable feed screws

SWITCHBLADE™ SELFEED BITS

OVERVIEW

The MILWAUKEE® SWITCHBLADE™ Selffeed Bits drill up to 12% faster and deliver up to 2X longer life. Designed for any trade that demands repetitive cutting of large holes in wood, SWITCHBLADE™ Selffeed Bits allow you to remove and replace blades rather than resharpen. You get a new bit with every quick, convenient change of the hardened steel blade, and less downtime on the job. An aggressive feed screw design enables the bit to pull through quickly for faster drilling. Built to last and designed to perform, SWITCHBLADE™ Selffeed Bits deliver more holes for the money.

FEATURES

- **Superior Performance:** Blades are easily replaced to provide a new bit on demand
- **Faster Drilling:** Aggressive feed screw design allows the bit to pull through wood faster
- **Longer Bit Life:** Replaceable blades are made of hardened steel
- **Easy Size Reference:** Bit and blades are engraved for quick and easy size identification
