Full Face Protective Gear.**

Instructions

1. Insert Pipe Shooter into drill chuck and tighten securely.
2. DO NOT operate in reverse. Run drill in forward only.
3. Insert blade into pipe to be cut off. Squeeze drill trigger to begin cut. Let blade penetrate completely through pipe wall. Be sure to hold drill straight at right-angle to pipe. Rotate 360° to complete cut.
4. Avoid blade contact with concrete or other hard objects as this will shorten blade life.
