Installation Instructions

PEX Supply Tubes

Installation

- Ensure a proper seal
- Make clean cut on riser
- Be sure riser is squared and flush fitting in supply stop
- Pipe dope, compounds and sealants should not be used for installation because they have been known to cause leakage
- Hand tighten - DO NOT OVERTIGHTEN
- Metal nuts tighten 1 additional turn with wrench
- Plastic nuts tighten to additional turn with wrench

Wolseley's North American operating companies assume no responsibility for failure due to improper installation.
