Product Information and Application Use

The lockable Uponor Manifold Wall Cabinet is adjustable to accommodate a brass manifold mounted in either a 2 x 4 or 2 x 6 stud wall. This is a recess-style cabinet and comes with a removable door-trim package. You can mount an Uponor Zone Control Module inside the cabinet for ease of wiring and away from exposure or possible damage.

Installation

Set the manifold cabinet into the wall cavity, flush with the opening. In a 2 x 4 wall, the manifold cabinet must be inserted to the back of the stud. In a 2 x 6 wall, the manifold cabinet should be approximately 1 to 2 inches from the back of the stud. Attach the manifold box to the stud framing with wood screws. Align the four door-trim brackets with the threaded posts and wing nuts located at the top and bottom on the left and right sides of the manifold box. Slide the door-trim inward until frame is tight to the wall. Secure the frame by tightening the wing nuts. Mount the latch to the door using supplied hardware. Attach the door to the door trim and lock door using the supplied key. For more information, refer to the Uponor Radiant Installation Handbook.
