### Notes

Install this product according to the installation guide.

**NOTICE:** Risk of product damage. Long screws, for installing trim, can damage the K-2971-KS valve. Consult the trim installation guide to verify if the thin wall installation kit (88526) is needed.

If installing one of the K-304 valves, install a straight pipe or tube drop of 7" (178 mm) to 18" (457 mm) with single elbow between valve and wall-mount spout. Elbow must be a 90 degree drop ell that is secured to rigid framing.

Cap the shower outlet if deck-mount spout, diverter, or handshower is connected to the spout outlet.

ADA, OBC, CSA B651 compliant when installed to the specific requirements of these regulations.
