- 3) Minimum safety factor of 1.5 in accordance with NFPA 13–2016 Section A.9.3.5.2.3. To convert the load ratings above to a safety factor of 2.2 per NFPA 13–2019 Section A.18.5.2.3, multiply load ratings by a factor of 0.68.
- 4) To convert to LRFD Load Ratings, ASD Load Ratings may be multiplied by a factor of 1.5.

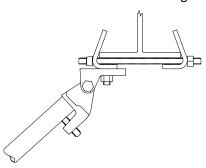

Installation

- Insert one ½" x 1½" hex bolt through the mounting hole of one bracket.
- Place both brackets on a horizontal steel flange.
- 3 Install two ½"-13 studs or bolts with the shear off nuts through the mounting slots on both brackets. Studs or bolts manufactured per ASTM A307 or equivalent.
- 4 Torque shear off nuts evenly and equally until the heads shear off.
- 5 Hand tighten the set screws until they contact the flange. Continue to torque the set screws until the heads break off.
- 6 nstall the ½" x 1½" mounting bolt through the ½" AF075, AF076, AF077, AF700, or AF771 mounting hole. The mounting bolt shall be installed wrench tight (Typically finger tight plus ¼ to ½ turns).
