

# Style 005 FireLock™ Rigid Coupling

# with Vic-Plus™ Gasket System

### PRODUCT DESCRIPTION

Patented

Exaggerated for Clarity

FireLock™ Style 005 rigid coupling has a unique, patented angle-pad design which allows the housings to offset while clamping the grooves. By permitting the housings to slide on the angled bolt pads, rigidity is obtained.

The FireLock couplings provide rigidity for valve connections, fire mains and long straight runs. Support and hanging requirements correspond to NFPA 13

ommended for use

Style 005 FireLock couplings with the Vic-Plus<sup>™</sup> Gasket System are designed and rec-

§ LPC and VdS Approved,

see notes on page 2

Sprinkler Systems. Angle-

bly by removing one nut/

housing over the gasket.

This reduces components

speeds and eases installa-

tion on pipe grooved to

Victaulic specifications.

to handle during assembly;

bolt and swinging the

pad design permits assem-

**ONLY** on fire protection systems.

Vic-Plus Gasket System: Victaulic® now offers a gasket system which requires no field lubrication. The Vic-Plus<sup>TM</sup> System (patent pending) is dry, clean, and non-toxic. It reduces assembly time substantially and eliminates the mess and chance of over-lubrication.

## **DIMENSIONS**

Rated for wet and dry sprinkler systems at 350 psi (2413 kPa) for 1¼ - 4" (32 - 100 mm) sizes and 300 psi (2068 kPa) for 41/4 - 8" (108 - 200 mm) sizes; Schedule 10 roll grooved or Schedule 40 cut or roll grooved steel pipe. Style 005 is rigid and does not accommodate expansion, contraction or angular deflection.

## MATERIAL SPECIFICATIONS

**Housing:** Ductile iron conforming to ASTM A-395, grade 65-45-15, and ASTM A-536, grade 65-45-12.

**Housing Coating:** Orange enamel

Optional: Hot dipped galvanized

#### Gasket:

☐ Grade "E" EPDM - Type A
Vic-Plus Gasket System †
(Violet color code). FireLock
products have been Listed by
Underwriters Laboratories

Inc. and Approved by Factory Mutual Research for wet and dry (oil free air) sprinkler services up to the rated working pressure using the Grade "E" Type A Vic-Plus Gasket System, requiring no field lubrication.

For dry services, Victaulic continues to recommend the use of Grade "E" Type A FlushSeal® Vic-Plus Gasket System. Contact Victaulic for details.

**Bolts/Nuts:** Heat treated carbon steel, zinc electroplated to ASTM B-633; Track head bolt conforming to ASTM A-183 minimum tensile 110,000 psi (758340 kPa); Flanged hex nut conforming to ASTM A-563, Grade A.

† Standard gasket and FlushSeal gasket approved for dry pipe systems to -40°F (-40°C). Supplemental lubricant is recommended for services installed at or continuously operating below 0°F (-18°C). Victaulic continues to recommend the use of FlushSeal gaskets for dry services.

The information provided below is based on the latest listing and approval data at the time of publication. Listings/Approvals are subject to change and/or additions by the approvals agencies. Contact Victaulic for performance on other pipe and the latest listings and approvals.

#### **NOTES:**

5 refers to Listed/Approved Schedule 5 steel sprinkler pipe.

10 refers to Listed/Approved Schedule 10 steel sprinkler pipe.

40 refers to Listed/Approved Schedule 40 steel sprinkler pipe.

BLT refers to Listed/Approved steel sprinkler pipe manufactured by American Tube Company.

DF refers to Listed/Approved Dyna-Flow steel sprinkler pipe manufactured by American Tube Company.

DT refers to Listed/Approved Dyna Thread steel sprinkler pipe manufactured by American Tube Company. EL refers to Listed/Approved Eddylite steel sprinkler pipe manufactured by Bull Moose Tube

EZ refers to Listed/Approved EZ-Flow steel sprinkler pipe manufactured by Northwest Pipe & Casing Co.

SF refers to Listed/Approved Super-Flo steel sprinkler pipe manufactured by Allied Tube and Conduit Corporation.

SL refers to Listed/Approved steel sprinkler pipe manufactured by Western Tube and Conduit Corporation.

Super 40/XL refers to Listed/ Approved Super 40 or Super XL steel sprinkler pipe manufactured by Allied Tube and Conduit Corporation.

WLS refers to Listed/Approved steel sprinkler pipe manufactured by Wheatland Tube Company.

XL/XL-II refers to Listed/Approved XL or XL-II steel sprinkler pipe manufactured by Allied Tube and Conduit Corporation.

#### **NOTES**

WARNING: FOR ONE TIME FIELD TEST ONLY, the Maximum Joint Working Pressure may be increased to 11/2 times the figures shown.

† For field installation only. FireLock Style 005 couplings are essentially rigid and do not accommodate expansion/contraction.

@ Number of bolts required equals number of housing segments.

Metric thread size bolts are available (color coded gold) for all coupling sizes upon request. Contact Victaulic for details.

§ Style 005 couplings are VdS and LPC Approved to 12 Bar (175 psi).

WARNING: Piping systems must always be depressurized and drained before attempting disassembly and removal of any Victaulic piping products.

This product shall be manufactured by Victaulic Company. All products shall be installed in accordance with current Victaulic installation/assembly instructions. Victaulic reserves the right to change product specifications, designs and standard equipment without notice and without incurring obligations.

<sup>\*</sup> Working Pressure and End Load are total, from all internal and external loads, based on standard weight (ANSI) steel pipe, standard roll or cut grooved in accordance with Victaulic specifications. Contact Victaulic for performance on other pipe.
