

IN WALL STOP VALVE APPLICATION AND DIMENSION CHART

1. Using 1/2" or 3/4" IPS, plumb the stop valve accordingly to the handle styles described below. (Measurement is from the center of water connection to outside of finished wall).

2. Allow 1 3/4" diameter hole for the valve stems.

3. Allow a 1 1/4" diameter hole for the shower arm or personal shower elbow.

WARNING: Where tile construction is planned for the finished walls, allow for the extra thickness dimensions when roughing the valves.

TEST FOR PROPER FUNCTION BEFORE CLOSING WALLS!

5. Apply the finish trim.

FINISH CARE INFORMATION

For clear coated or enamel color finishes:

We recommend that all faucets, drains, etc. be gently wiped dry with a soft cloth after use to avoid water spotting and water deposit buildup. A mild liquid hand soap, such as Ivory may be used occasionally if desired. Use of a non-abrasive carnauba wax will add protection to the finish and should be used if the faucets will not be dried after use. Santec Orobrass kitchen products are clear coated.

For non-clear coated and specialty finishes:

We recommend that all faucets, drains, etc. be gently wiped dry with a soft cloth after use to avoid water spotting and water deposit buildup. Use of a non-abrasive carnauba wax is required occasionally.

Santec has obtained applicable code (standards) listings generally available on a national basis for products of this type. It is the responsibility of the installer/owner to determine specific local code compliance prior to installation of the product. Santec makes no representation or warranty regarding, and will not be responsible for any code compliance.

Some products listed in this catalog may not be approved for use in the state of Massachusetts, check with your Local Authority or Licensed Plumber to assure code compliance.
