**Material Number MB932U8, U51TB-E - Ball Valve - Model D, Universal End, Tru-Bloc® True Union, Corzan® HP CPVC Schedule 80, EPDM**

The original Chemtrol® True Union design allows the valve and operational components to be conveniently lifted from the piping system for repair or replacement. Tru-Bloc® advances the True Union concept with the self-adjusting energizer O-ring. The valve can be easily joined with the universal socket and threaded end connections. Please refer to Chemtrol technical data sheets, chemical resistance guides and catalogs for engineering and installation information. Corzan® CPVC Schedule 80
