

# CHIMNEY LINERS

## FLEXI-LINER & STAFLEX-316/294 CHIMNEY LINER KITS

### FLEXI-LINER and STAFLEX are the Chimney Liners with Superior Strength and Flexibility

Totaline FLEXI-LINERS and STAFLEX Kits stop condensation which is the primary cause of masonry chimney deterioration. Installing a lightweight, properly sized, chimney liner will help create efficient, condensate free venting. Insulating the liner is recommended and will further enhance operation of the venting system.

#### FLEXI-LINER — The “Condensate Eliminator”

- Stops condensation and chimney deterioration.
- Intended for use with natural gas and propane fired appliances.
- Underwriters (ULC & UL) listed for masonry or factory built chimneys and vents.
- Corrosion resistant, unique gas tight patented seam.
- Ultimate flexibility handles the most challenging chimneys.
- All required components come in one complete kit.
- Available in sizes from 3” through 12”.
