

Available in 15 and 20 Gallon Electric Models

- ▶ Residential Use: Lifetime Limited Tank Warranty, 6-Year Limited Parts Warranty*
- ▶ Light Duty Commercial Use: 10-Year Limited Tank Warranty, 1-Year Limited Parts Warranty*

- Seamless, blow-molded, polybutylene tank – impervious to rust and corrosion
- Multiple layers of filament wound fiberglass give the tank unmatched strength
- Polyurethane **Envirofoam™** insulation helps reduce energy consumption
- The most energy efficient in its class
- Recessed brass drain valve is out of the way of brooms and scrubbers
- Tough molded polyethylene outer shell resists dents and scratches
- Bowl shaped bottom allows complete sediment draining
- High temperature polysulfone dip tubes
- All plastic tank eliminates the need for an anode rod
- Thermally fused element to protect tank against “dry-fire”; low watt, density for long life
- Factory installed temperature and pressure relief valve
- Factory installed vacuum relief valve
- Inlet and outlet connections are 3/4" NPT
- Water tight grommets keep out overhead moisture and condensation

*See Marathon Point-of-Use Warranty Information Brochure for complete warranty information.

Marathon Point-of-Use water heaters are built to the same specifications as our full-size Marathons. These point-of-use water heaters are great for applications where the larger water heaters won't fit, or for special uses such as:

- Apartments and condo's
- Restrooms in offices and commercial buildings
- Cabins, camps and recreational property
- Lavatories in large homes away from central water heating system

Before you buy another water heater...Save your Energy!

When heating water with electric immersion elements, 100% of the element's energy goes into the water. The difference between an energy efficient model and a standard heater is in its ability to retain the temperature of the water. The Marathon heater will outperform any other heater of comparable size.

* For the purpose of this test, water was heated in two heaters of the same size. Power was then cut-off to the heaters and temperatures were monitored until they fell below the temperature of 110°F. We recommend the heater be operated at factory settings. Water hotter than 120°F can cause scalding injuries.

These units are designed to meet or exceed ANSI (American National Standards Institute) requirements and have been tested according to D.O.E. test procedures and meet or exceed the energy efficiency requirements of NAECA, ASHRAE standard 90, ICC Code and all state energy efficiency performance criteria for energy consuming appliances.

Before purchasing this appliance, read important energy cost and efficiency information available from your supplier.

The Marathon Point-of-Use Water Heater Warranty

RESIDENTIAL USE

LIFETIME / 6 YEARS*

Privately owned, single family dwellings – the tank is warranted not to leak “for as long as you own your home”. If the home is sold, the warranty reverts to fifteen years from the date of the installation and the second owner received coverage for the time remaining. Parts are warranted for 6 years from the date of manufacture or 5 years from the effective date, whichever is greater.

LIGHT DUTY COMMERCIAL USE

10 YEARS / 1 YEAR*

Apartments, condominiums, restrooms in office and commercial buildings, multifamily housing or any light duty commercial/industrial use – the tank is warranted for 10 years from the date of installation. Parts are warranted for 1 year from the date of manufacture.

* See Marathon Point-of-Use Warranty Information Brochure at your dealer for complete warranty information.
