Threaded Fittings

Threaded fittings through 48" are available from Specified. We thread in male/female, straight, NST, or any other thread type. Our machine shops in Bellingham and Stevensville have broad capabilities in this area. Whether a one-off or multiples, we can handle the request! ■

Dissimilar Outlets

All tees, crosses, and wyes made by Specified Fittings in any of our products groups can be made with dissimilar outlets. For example, an 8x8x4 tee with gasketed SDR35 bells on the run and corrugated ADS on the outlet, or an 8x8x8 cross with gasketed C-900 bells on the run and solid wall HDPE on the outlet. There is no limit other than imagination to the permutations we can do! ■

Perforating

Do not forget Specified Fittings for perforated pipe in PVC and HDPE. Whether a little or a lot, we will give you a quote on your perforating specs no matter how unusual. ■

A WORD ABOUT OUR HOURS

We try to have hours that work for our East Coast customers:
Stevensville opens at 7:30 AM (9:30 AM ET) and closes at 5PM (7PM ET).

Bellingham opens at 6AM (9AM ET) and closes at 5PM (8PM ET).

The importance of these hours other than early access to our sales force is the late night shipping possibilities. If you need something shipped for next day delivery, and you are in an Eastern Time Zone, you could order up to 7:30 your time, and still expect it the next day. In the emergency, "I don't care what the freight costs. My customer needs it here tomorrow" scenarios we will ship from stock up until 4PM or later from Stevensville or Bellingham. Because we have no minimum purchase requirement, whether you need a \$.50 PVC nipple or a \$500.00 stainless steel back up ring we will ship in-stock orders if you need it.

PVC GASKETED PIP FITTINGS

Yes, Specified Fittings is your source for a variety of valve products: PVC end flap gates, backwater valves, sheer gates, PVC butterfly and HDPE backwater valves are just a sample of styles and types we fabricate. We also stock gate, ball, butterfly, diaphragm, check, and needle valves that are manufactured by other companies. These valves are available in 1/4" through 48" diameter in a variety of trim and end configurations. Valves for IPS, PIP, Sewer, C-900, C-905, and all profile pipes as well as HDPE solid wall are all produced at Specified Fittings. Speaking of valves, Specified Fittings

also makes adapter flanges in glue bell, spigot end, and gasket bell to adapt to any type of pipe from a flanged end valve. With these adapter flanges, it is no longer a problem to place a flanged valve into a line at any point. Flanges of this type are available in 1/2" through 60" diameter, in a Van Stone style for easy installation. Because the majority of our valves are made completely from plastic material, the non-corrosive benefits of our valves are evident. Our uniquely designed PVC sheer gate is a great example. These sheer gates are commonly used in flow control devices because of the potential corrosion associated with these installations. Our PVC construction is a perfect example of the superiority of the PVC product. So for your specialty valving needs, all you need to remember is: Specified Fittings!

Many times when considering a special product or determining whether a certain fittings can fit a particular dimensional configuration, it is helpful to have a drawing prior to purchase. Our CAD operators, Brad Sukolsky (bsukolsky@specfit.com) and Derek Eirish (deirish@specfit.com), can provide you with such a service. If you need a drawing please call, fax, or email Brad, and he or Derek will respond promptly. Also, if you are designing a product and need technical data such as flow characteristics, impact information, dimensional sizing, or any other professional help, Brad Sukolsky and our friendly staff are here to assist you.

For our customer North of the Border we are please to announce the completion of our CSA certification for SDR35/F679 sewer fittings 4"-48". Our fittings, whether sold in Canada or the US, will

bear the certification to CSA specifications. As an aside, every test performed to fulfill these requirements was passed on the first attempt. It mattered not whether tee, wye, coupling, or cap—to name a few configurations; all tests without incidence or problem at the first slap of the puck.

We are now working on our C900/C905 certification, which will be forthcoming soon. Presently, our Canadian basket of approved products are: sewer fittings, HDPE fittings, PIP fittings, molded Sch40 and Sch80, and C900/ C905 fittings in the province of Quebec.

PVC GASKETED PIP FITTINGS

PVC FITTINGS

PIP: SOLVENT WELD SDR81 - SDR32.5

Specified Fittings

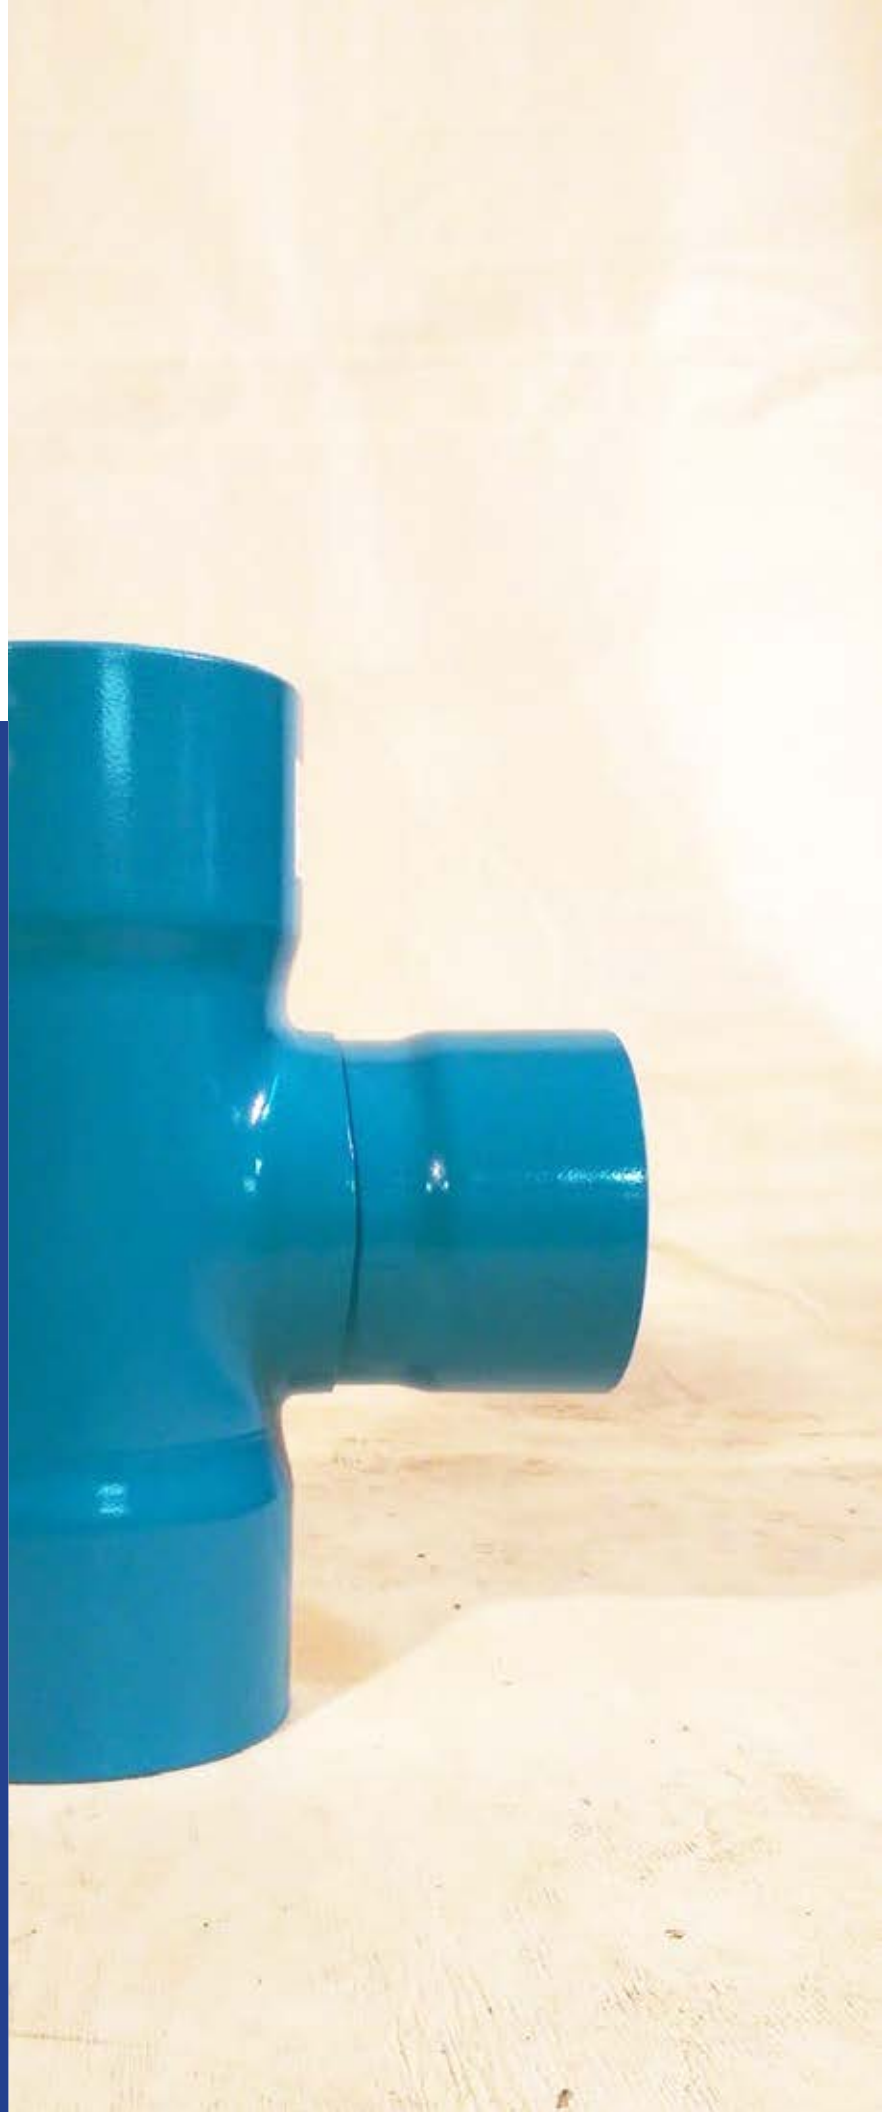

Frequently Asked Questions

Q: Can PVC be successfully fused for pressure applications?

A: We cannot vouch for others, but at Specified Fittings the answer is yes. Although not totally at liberty to describe the method we use to achieve universally successful fuses, suffice it to say with over a decade of experience, the PVC fuse for pressure is a done deal at Specified.

Q: Why are gaskets made from different materials?

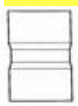

A: Each gasket material, whether SBR, EPDM, FKM (Viton), NBR (Buna-N), or CR have properties that make them the gasket of choice when the contents of pipeline dictate. Handling of diverse products or conditions such as steam, alcohol, methanol, greases, low temperature, or silicate ester lubricants, demand a certain gasket material with the proper resistant characteristics.

Yes, Specified Fittings is your source for a variety of valve products: PVC end flap gates, backwater valves, sheer gates, PVC butterfly and HDPE backwater valves are just a sample of styles and types we fabricate. We also stock gate, ball, butterfly, diaphragm, check, and needle valves that are manufactured by other companies. These valves are available in 1/4" through 48" diameter in a variety of trim and end configurations. Valves for IPS, PIP, Sewer, C-900, C-905, and all profile pipes *as well as* HDPE solid wall are all produced at Specified Fittings. Speaking of valves, Specified Fittings also makes adapter flanges in glue bell, spigot end, and gasket bell to adapt to any type of pipe from a flanged end valve. With these adapter flanges, it is no longer a problem to place a flanged valve into a line at any point. Flanges of this type are available in 1/2" through 60" diameter, in a Van Stone style for easy installation. Because the majority of our valves are made completely from plastic material, the non-corrosive benefits of our valves are evident. Our uniquely designed PVC sheer gate is a great example. These sheer gates are commonly used in flow control devices because of the potential corrosion associated with these installations. Our PVC construction is a perfect example of the superiority of the PVC product. So for your specialty valving needs, all you need to remember is: Specified Fittings!

PVC SOLVENT WELD PIP FITTINGS

For Our Farmers...

Aptly named, the Z-Drop Pipe is a great replacement for the standard steel pipe that is commonly used to tie in a pivot from an underground mainline. Certain soil conditions are very corrosive to steel, and thus their lifespan is significantly shortened. A UV resistant HDPE Z-Drop is a perfect fit for these types of installations. ■

Below: A Z-Drop in the works. ▼

As storm water management gains greater importance throughout the nation, Specified is here to help with some of the problems that arise. We manufacture non-corrosive, built to specification flow control structures, with or without PVC/HDPE shear gates, for manholes and catch basins. These structures, built from HDPE or PVC are the finest replacements for metal equivalents, which are subject to decay or corrosion. Flow control structures may be combined with any of our thousands of other products for achieving a complete solution and a freight prepaid order.

A WORD ABOUT OUR HOURS

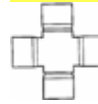

We try to have hours that work for our East Coast customers:
Stevensville opens at 7:30 AM (9:30 AM ET) and closes at 5PM (7PM ET).

Bellingham opens at 6AM (9AM ET) and closes at 5PM (8PM ET).

The importance of these hours other than early access to our sales force is the late night shipping possibilities. If you need something shipped for next day delivery, and you are in an Eastern Time Zone, you could order up to 7:30 your time, and still expect it the next day. In the emergency, "I don't care what the freight costs. My customer needs it here tomorrow" scenarios we will ship from stock up until 4PM or later from Stevensville or Bellingham. Because we have no minimum purchase requirement, whether you need a \$.50 PVC nipple or a \$500.00 stainless steel back up ring we will ship in-stock orders if you need it.

Many times when considering a special product or determining whether a certain fittings can fit a particular

dimensional configuration, it is helpful to have a drawing prior to purchase. Our CAD operators, Brad Sukolsky (bsukolsky@specfit.com) and Derek Eirish (deirish@specfit.com), can provide you with such a service. If you need a drawing please call, fax, or email Brad, and he or Derek will respond promptly. Also, if you are designing a product and need technical data such as flow characteristics, impact information, dimensional sizing, or any other professional help, Brad Sukolsky and our friendly staff are here to assist you.

High Density Polyethylene

Characteristics:

- Durable plastic
- Weather resistant
- Joints fused together for pressure resistance
- Absorbs shock waves
- More abrasion resistant
- 250% thicker than PVC counterpart
- Petroleum based
- Flexibility

Applications:

- Potable Water
- Force Main Sewer
- Mining Applications
- Industrial Applications
- Lower pressure installations
- Above ground Ag Applications

PVC or HDPE? What Should You Use?

The two most popular types of plastic pipe tend to invoke a sense of rivalry in the pipe industry. But is one really **better** than the other? Each was designed with specific applications in mind, so let our diagram help to determine what is right for **your** project! ■

Disclaimer: Always ask an engineer to approve your application of any pipe or fittings.

Polyvinyl Chloride

Characteristics:

- Durable plastic
- More affordable
- Many types of joints including solvent weld and gasketed
- Easy to install
- Thin wall , lightweight strength to weight ratio
- Flexibility
- Non-corrosive
- Flame resistant

Applications:

- DWV
- Sewers and Drains
- Water Service
- Hot & Cold Water Distribution
- Ag/Turf

HEAT & AIR FITTINGS

◀ Need to impress your mother-in-law? We build birdhouses!

▶ "Whisper phones" were built for a class of Pre-K and Kindergarteners. They allow the children to hear their own speech while reading aloud, which helps them to enunciate more clearly.

▲ A children's slide made from Plastic Irrigation Pipe. Installed on the upper terrace of a backyard, it travels through a line of hedges and down to the lower terrace.

The Endless Possibilities of Plastic Pipe

PVC FITTINGS

IPS: GSK & SW SDR32.5 - SDR64

Specified **F**ittings

Long Pattern Repair Couplings

Looking for long pattern repair couplings? Give us a call. We can make any size 1-1/2"-48" nominal diameter for any type of pipe (IPS, C-900/905, SDR35/F679, Profile, PIP), in lengths up to 18' (216"). Whether used on PVC or HDPE these products are a great help when repair or expansion/contraction in place is needed. ■

Certainteed Couplings

We stock and distribute the full line of Certainteed couplings: C-900 DR14 4"-12" in repair and deflection (stop), IPS SDR17 and SDR21 1-1/2"-12" in repair, stop and long pattern repair (18" OAL). We ship same day and keep a representative inventory. You may combine these with any other PVC or CPVC product to obtain freight allowance. ■

Internal Couplings

Specified Fittings makes internal couplings. These couplings allow the installer to continue installation when pipe is flush with a surface. An example of this would be a pipe cut off flush with a wall in a vault or manhole. We make these for all sizes and IDs of pipe: whether IPS, Sewer, C-900/905, PIP, HDPE solid, or PVC Profile pipe. This product is an inexpensive rescue product that can make you a hero. ■

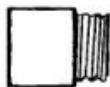

Bolted Repair Couplings

Our bolted repair coupling line is now finished. These versatile products are available in PIP and IPS, sizes 6"-15" where applicable, lengths 12" and 18" with custom lengths also available. Additionally, they are made with zinc or stainless trim, rated in excess of 100PSI, and are stocked in both Idaho and Washington facilities. Competitively priced, with easy installation features, we encourage you to give them a try. Call Bill or Josh in Idaho (208-852-0587), or any PVC salesperson in Bellingham for information! ■

Frequently Asked Questions

Q: What are the effects of PVC exposure to sunlight?

A: Ultraviolet (UV) radiation from sunlight can affect the outermost surface of PVC pipe. However, even after prolonged exposure, there is no practical effect on PVC pipe's performance characteristics. UV exposure affects PVC pipe material in two ways:

- Fading of pigment, which is characterized by whitening of the pipe's color. Since the pipe is intended to be buried, pigments are not colorfast and will fade when exposed to sunlight.
- Conversion of PVC molecules to polyene, which is a yellowish discoloration limited to the first .001" to .002" of exposed surface. Often called "UV degradation" or "sunburn," this process takes much longer than the color-fading phase.

Q: What information is included on the product label attached to fittings?

A: A label is attached to every fitting we fabricate prior to shipment. This label includes Company information including address and telephone number, the fitting's part number and description including size, and a work order or sales order number which allows us to trace the manufacturing process. Additional information such as location tags or ASTM/AWWA specifications can also be added. ■

PVC IPS FITTINGS GASKETED PRESSURE: SDR26-SDR21

C-900 Fittings

C-900 fittings through 60" are available from Specified Fittings and exclusively use the Reiber locked-in, steel backed gasket. These gaskets are generally of SBR composition but are also available in EPDM, FKM, Viton, Nitrile, and CR—to name a few. All these fittings can be manufactured to meet current AWWA C-900 specifications as well as the new upcoming AWWA standards. Remember large diameter PVC fittings are the best choice for all sewer and force main sewer applications. You do not have to coat PVC fittings; they are already noncorrosive. With C-900 fittings, we are nearing the universal PVC application for which the industry is looking. Specified

Fittings also makes manhole entry pieces 4" through 60" diameter for C-900. These fittings are coated on the exterior with a PVC silicate, giving a leak-free connection through the manhole wall. Cleanouts, female adapters, and threaded plugs are also available for 4" through 24" C-900. More of the diverse products we make in C-900 are: solvent weld fittings, and degree of elbow, deflection and repair couplings, adapter flanges in gasket and solvent weld ends, offsets, and one piece sweep bends in a myriad of radii and angles. If you need C-900, 4" through 60" fittings, please call us to get the information you need! ■

► “Whisper phones” were built for a class of Pre-K and Kindergarteners. They allow the children to hear their own speech while reading aloud, which helps them to enunciate more clearly.

◀ Need to impress your mother-in-law? We build birdhouses!

▲ A children’s slide made from Plastic Irrigation Pipe. Installed on the upper terrace of a backyard, it travels through a line of hedges and down to the lower terrace.

C-900 GASKETED PRESSURE

Spec-Loc Products

Our Spec-Loc line, featuring the Bulldog Restraint System, is available in both C-900 (4", 6", 8", 10", 12", 14", 16", & 24") and IPS (3"-8"). Although applications vary, they work well in the rural water industry due to no external restraints to corrode, ease of installation, longevity of product, and overall savings to the installer.

We Hydro-Test!

Have a job where the fittings are required to be hydro-tested? Look no further than Specified Fittings. This service is available in both Bellingham and Stevensville. Contact hdpesales@specfit.com for HDPE testing and pvcsales@specfit.com for PVC testing today!

C-900 GASKETED NON-PRESSURE

Specified's "Schedule" Selection

How about *that* for alliteration? Seriously though, Specified Fittings offers a complete selection of molded and fabricated Sch40 PVC, Sch80 PVC, Sch40 CPVC, and Sch80 CPVC 1/8" - 24" where applicable. Our product knowledge and service level make us a great resource for these products—whether you're filling out a fabricated order or just looking for molded fittings. We sell molded 10" and 12" Sch40, Sch80, Sch80 CPVC at competitive prices as well as fabricated in all configurations of 10" and 12".

In the size range 14" - 24" in the aforementioned materials, no one offers a broader line than Specified Fittings. Whether non-pressure, low pressure, fully rated, fiberglass reinforced, spouted, fused, glue joint, gasket joint, or grooved connections, we do it all. Bring your list, job requirements, estimates in whatever form you wish, and let our Inside Sales Team put some numbers to your needs. If it is industrial fittings you need, Specified is a great resource!

P.S. Remember: Our entire pipe inventory can be purchased—cut to length: Sch40 & Sch80 CPVC through 24", Sch40 & Sch80 through 24", Sch120 through 6" to name but a few. ■

SEWER & PROFILE FITTINGS

Frequently Asked Questions

Q: What about surge pressures in PVC and HDPE piping?

A: Surge pressures in HDPE & PVC are significantly lower than in DI pipe due to the lower value of dynamic modulus. For example, in a typical 8" line a velocity change of 5 fps would cause a 51 psi surge in HDPE DR17 pipe, a 87 psi surge in PVC DR18 pipe, and a 262 psi surge in DI Class 350 lined pipe. Lower surge pressures often mean longer life for pumps and valves in an HDPE pipeline, as well as lower pressure class pipes. The "pressure ratings" of our PVC and HDPE fittings allow for occasional and recurring surges.

Q: How does use of plastic pipe save an owner money?

A: Both PVC and HDPE are attractive due to their high strength-to-weight ratios. This translates into everything from smaller machinery needed for handling and installation to fewer lower-back-pain workers comp claims. Further, their non-metallic nature means that they will perform satisfactorily for longer than other piping materials due to elimination of interior corrosion and tuberculation and exterior reaction to "hot" soils and electro-galvanic corrosion. Further, the very low leak rates for PVC and HDPE piping recommend these materials to specifying engineers and long-term cost-savvy owners for both pipe and fittings.

Q: Where can I find design manuals for PVC and HDPE pipe and fittings?

A: The trade associations for each material are great resources for technical resources. The Plastic Pipe Institute (plasticpipe.org) represents the HDPE piping industry and The Uni-Bell PVC Pipe Association (uni-bell.org) represents the PVC pipe industry. Each publishes a handbook of design and construction as well as technical papers and research findings.

Q: What's the difference between PVC solvent-cement and glue?

A: In common language, PVC solvent-cement is often misspoken of as a "glue" but this is not accurate and does not give it its proper due. PVC solvent cement is made of two basic components, a solvent that softens and "opens up" PVC pipe and fittings as well as PVC resin dissolved in the solvent. When applied at a PVC piping joint, the solvent softens the two mating surfaces while the PVC resin impregnates both surfaces. Once cured, this joint is homogeneous in cross section—it is a true weld where the two pieces have become one. This differs from a glue which is strictly an adhesive simply grabbing and sticking to each surface. Properly solvent-cemented joints are fully restrained and equal in strength to the piping material itself.

DUCT FITTINGS

PVC & CPVC

Specified **F**ittings

Duct Fittings

When looking for duct fittings, think of Specified Fittings. We provide a complete line of duct fittings 4" through 48" in PVC and CPVC--whether residential or commercial. Duct accessories such as blast gates, valve end dampers, and rain caps are also available. Our commercial ducting is predominantly made from Harvel duct, which meets all the relevant requirements pertaining to fire codes and material. Our duct fittings are available in a variety of configurations and used in a number of locations such as hospitals, chip plants, restaurants, schools, and automotive shops just to name a few. ■

Downspout Adapters

John Fogarty may have asked, "*Who'll stop the rain?*," and although Specified Fittings may not be able to stop the rain, we can certainly contain it with our vast array of downspout adapters. Whether connecting on the top end to square, rectangular, or round shapes, and adapting to plastic, aluminum, or steel material, we have mandrels for all. Downspouts are available in sizes 3"-24" for any material or shape. We are only limited by **your** imagination! ■

Expansion Joints

Although not in our catalog currently, you may be interested in Specified Fittings' complete line of SCH80 PVC and CPVC fabricated expansion joints. These O-ring style expansion joints are available with EPDM O-rings in both 6" and 12" travel, and sizes range from 1/2"-14". If looking for an alternative for this product from the big guy, we would be glad to quote you. ■

DUCT FITTINGS

The Creation of a PVC Pipe Fitting...

Many of you spend your days in an office with your eyes focused on a computer screen. You make calls, receive or submit orders, sell fittings to your customers, talk the fittings talk, see the product in the field, but have you ever wondered just how a fitting is made? We've displayed below the process of a PVC C-900 x Sewer Reducing Wye from its beginnings in Specified Fittings' pipe yard to its packaging stage in our Shipping Department.

Start

1 One sunny, spring day in Bellingham, a lift of 8" DR18 pipe sat in Specified Fittings' pipe yard, waiting for their life as fittings to begin. A forklift suddenly appeared, grabbed a stick of pipe, and whisked it off to the Saw Room.

2 Busy Saw Room workers cut the stick to length, marked the desired fitting on the pieces, and moved them to the next station to be beveled.

3 Once beveled, another Specified employee carefully bored a hole into each piece's center and pulled it for an outlet to be installed.

Finish

6 The pieces, now labeled by QC as 8"x4" Gasketed DR18 x SDR35 Wyes, were packed neatly in layers by the Specified Fittings Shipping Crew, where they awaited a freight truck to transport them to a customer's destination. It had been a busy day!

5 A gluer efficiently solvent welded a 4" D3034 gasket branch into each piece, and sent them on their way to Quality Control to be cleaned, labeled, and inspected.

4 Next stop on the pieces' journey: the press belled the ends, and gaskets were installed. They were ready to be sent to the Gluing Department.

^a Products include J-M Perma-Loc™, Ultra-Rib™, Vylon™, Pro21™ etc.

^b Products include Ultra-Corr™, A-2000™.

^c Please indicate brand name.

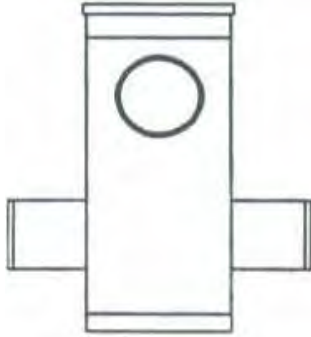

Whether you need price and availability, technical information or submittal drawings, customer service is always just a phone call away. Our offices are open from 6 AM to 5:00 PM PST/PDT.

You may e-mail us your comments, requests for quotation or orders to spec@specfit.com. RFQ's received before 2 PM PST/PDT are answered the same day.

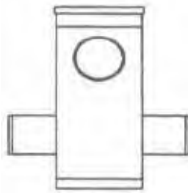

Can't find what you need in the catalog? Don't know where to look? Call customer service for assistance.

Need an item on site fast and can't wait for the traditional carriers? Let us use our contacts to find a carrier who can get it to you on your timetable, not theirs.

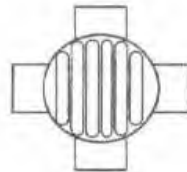

CATCH BASINS ^{1, 2, 4}

Basin w/ Round Grate	Outlet Sizes	Height 12" - 60"	Height 61" - 120"
8" Basin W/ Grate	4" - 8"	\$240.00	\$300.00
10" Basin W/ Grate	4" - 10"	\$320.00	\$400.00
12" Basin W/ Grate	4" - 12"	\$500.00	\$660.00
15" Basin W/ Grate	4" - 15"	\$700.00	\$890.00

36" Basin W/ Grate	4" - 36"	CF	CF

Side View

Top View

(See page 12 for detailed drawing).

¹ Up to 4 outlets at the same price.

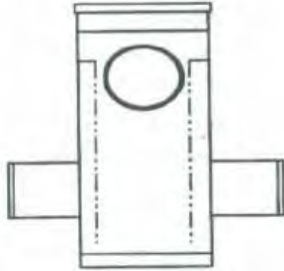

² Size on size basins will fit up to 2 size on size inlet/outlet(s).

³ Standard height invert to top of grate. **BECAUSE FRAME & GRATE FIT RESPECTIVELY THE OD AND ID OF THE BASIN TOP, YOU MAY WANT TO ORDER LONGER BASIN AND FIELD CUT TO GRADE.**

⁴ 24,30,36,42 & 48 catch basins only -- add 53.33 list for each outlet up to 18" in excess of one, add 133.33 for each outlet 24" and up in excess of one.

Specified Fittings will not pay freight on orders of 30" or larger Basins. Or any Basin that is taller than 80" (OAL).

CATCH BASIN BAFFLES 1, 2, 4, 5

(See page 13 for detailed drawing).

* Basic part number

Catch basin drains may be furnished with internal baffle. This option gives the user an inexpensive way to remove various kinds of floating debris and regulate flow from the basin. Because this unit is made entirely from maximum walled SDR35-F679 material, it has resistance to the same array of pure and diluted chemicals as the pipe, thus eliminating any concerns that might arise about the overall efficacy of the structure.

APPLICATIONS

Oil/Water Separator

Baffle will trap and separate hydrocarbons from the water run off. "Floating" residue must be periodically collected with the use of vacuum equipment.

Sediment Filter

Drain basins equipped with slotted baffles can be used for sediment collection. Regular cleaning should be performed to maintain maximum efficiency of the catch basin drain. Where levels of sedimentation may be heavier than usual, more frequent cleaning will be required.

Foul Air Control

The baffle functions as a foul air trap. This is particularly useful in sanitary and leachate systems.

Flow Control

Whether for a one-hundred year flood or controlling flow into a city treatment plant, the catch basin drain equipped with an internal baffle can accommodate and regulate flow by selective sizing.

¹ Up to 4 outlets at the same price.

² For drains with outlets dissimilar in size, type or position, please contact factory.

³ You may order catch basins any length and field cut to grade.

⁴ Standard height invert to top of grate. **BECAUSE FRAME & GRATE FIT RESPECTIVELY THE OD AND ID OF THE BASIN TOP, YOU MAY WANT TO ORDER LONGER BASIN AND FIELD CUT TO GRADE.**

⁵ 24,30,36,42 & 48 catch basins only -- add 53.33 list for each outlet up to 18" in excess of one, add 133.33 for each outlet 24" and up in excess of one.

IMPORTANT

IF GRATE STYLE OTHER THAN FLAT IS DESIRED, ADD LIST PRICES ABOVE TO COST OF DRAIN.

STANDARD GRATE FEATURES:

- Grates are flat with linear openings and are bicycle safe.
- Grates are ductile iron.
- Grates are H-20 rated.

SPECIAL GRATE FEATURES:

- Grates can be provided domed, pedestrian friendly, solid, locking top, epoxy-coated H-20 rated. Contact factory for details.

HOW TO ORDER:

CATCH BASIN:

1. Select basic part number.
2. Determine outlet size(s) desired. 8" = 8; 12" = 12; 24" =
3. Select type of pipe connection from codes listed below.
4. Indicate number of outlets
5. Be sure to indicate if outlet(s) is (are) solvent weld end or gasket end.
6. **SEE CONVENIENT ORDER FORM ON PAGE 28.**

Example:

	P/N	OUTLET SIZE	PIPE	NO./OUTLETS
18" catch basin with two 15" sewer outlets =	<u>9329318</u>	<u>15</u>	SWR	2
24" catch basin with two 18" Perma-Loc™ outlets =	<u>9329324</u>	<u>18</u>	PLC	2
24" catch basin with three 12" C-900 outlets =	<u>9329324</u>	<u>12</u>	CDD	3

Pipe Connection Codes:

ACO = A-2000 C _i	PLC = Perma-Loc™
ADS = N12™	P21 = Pro21™
CDD = AWWA cast iron dimension	SWR = SDR35/F679 Sewer
HAN = Hancor Sure-Lok™	ULC = Ultra-Corr™
IPS = Iron pipe size	ULR = Ultra-Rib™
PIP = Plastic irrigation pipe	VYL = Vylon™
CRU = Crumpler	LAN = Lane™
QC = Quality Culvert	PRI = Princo

EXTENSION RISER:

1. Select basic part number.
2. Designate riser length (in inches). 8" = 8; 12" = 12; 24" = 24, etc

Example:

	BASIC P/N	LENGTH
25" extension riser for 24" catch basin drain =	<u>9329424</u>	<u>25</u>
8" extension riser for 15" catch basin drain =	<u>9329415</u>	<u>8</u>
100" extension riser for 18" catch basin drain =	<u>9329418</u>	<u>100</u>

Risers are available in any length desired and are billed in increments of whole lineal feet. Fractions of feet will be rounded up to the nearest foot.

INLINE DRAIN

(See page 14 for detailed drawing)

In-Line Drain with Grate	Outlet Sizes	Price (including grate)
8" In-Line Drain W/ Grate	4" - 8"	\$72.00
10" In-Line Drain W/ Grate	4" - 10"	\$90.00
12" In-Line Drain W/ Grate	4" - 12"	\$300.00
15" In-Line Drain W/ Grate	4" - 15"	\$350.00
18" In-Line Drain W/ Grate	4" - 18"	\$460.00
24" In-Line Drain W/ Grate	4" - 24"	\$1,050.00
30" In-Line Drain W/ Grate	4" - 30"	CF
36" In-Line Drain W/ Grate	4" - 36"	CF

How to order inline drain:

1. Select basic part number.
2. Select outlet size. 8" = 8; 12" = 12; 24" = 24, etc.
3. Select type of pipe connection from codes listed below.
4. Be sure to indicate if outlet(s) is (are) solvent weld end or gasket end.

Example:

18" inline drain with 8" PIP connection =	9329218	8	PIP
24" inline drain with 24" Ultra-Corr TM connection =	9329224	24	ULC

Pipe Connection Codes:

ACO = A-2000 ContechTM

ADS = N12TM

CDD = AWWA cast iron dimension

HAN = Hancor Sure-LokTM

IPS = Iron pipe size

PIP = Plastic irrigation pipe

CRU = Crumpler

QC = Quality Culvert

QUA = QUAIL

PLC = Perma-LocTM

P21 = Pro21TM

SWR = SDR35/F679 sewer

ULC = Ultra-CorrTM

ULR = Ultra-RibTM

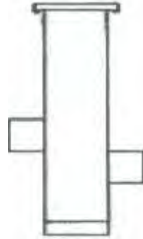

VYL = VylonTM

LAN = LaneTM

PRI = Princo

Specified Fittings will not pay freight on orders of 30" or larger Inline Drain.

DRAIN, STORMWATER DEBRIS CATCH BASIN

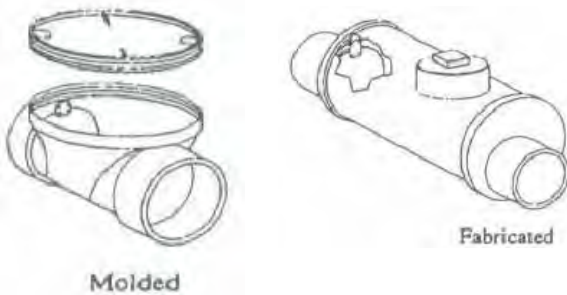

(See page 15 for detailed drawing).

Size	Part No.	List Price
8X4X4	93295844DWV	\$300.00
CAP FOR ABOVE	931908	\$75.00
8" BUCKET	93 BUCKET	\$71.00

The stormwater debris catch basin is used to filter leaves, needles and other debris carried in stormwater for subsurface disposal. The stormwater enters through the inlet and is filtered through slotted PVC pipe before flowing out again through the outlet. The cap at the top of the basin is removable for easy cleaning.

BACK WATER VALVE ¹

Prevents backflow in drain lines and eliminates backup when water levels rise. Four- and six-inch valves are injection molded PVC. Eight-inch through twelve-inch valves are fabricated from PVC pipe.

Size	Part No.	List Price
4	__ 9114 *	\$75.00
6	__ 9116 *	\$180.00
8	__ 9118 *	\$360.00
10	__ 91110 *	\$730.00
12	__ 91112 *	\$850.00

* Basic part number

How to order backwater valve:

1. Select type of pipe connection from codes listed below.
2. Select basic part number.

Pipe Connection Codes:

D3034 Sewer	81
IPS	73
PIP	07

Example:

8" backwater valve with IPS outlet =	73	9118
12" backwater valve with D3034 outlet =	81	91112

¹ Other outlets available. Contact factory for details.

CATCH BASIN DRAIN

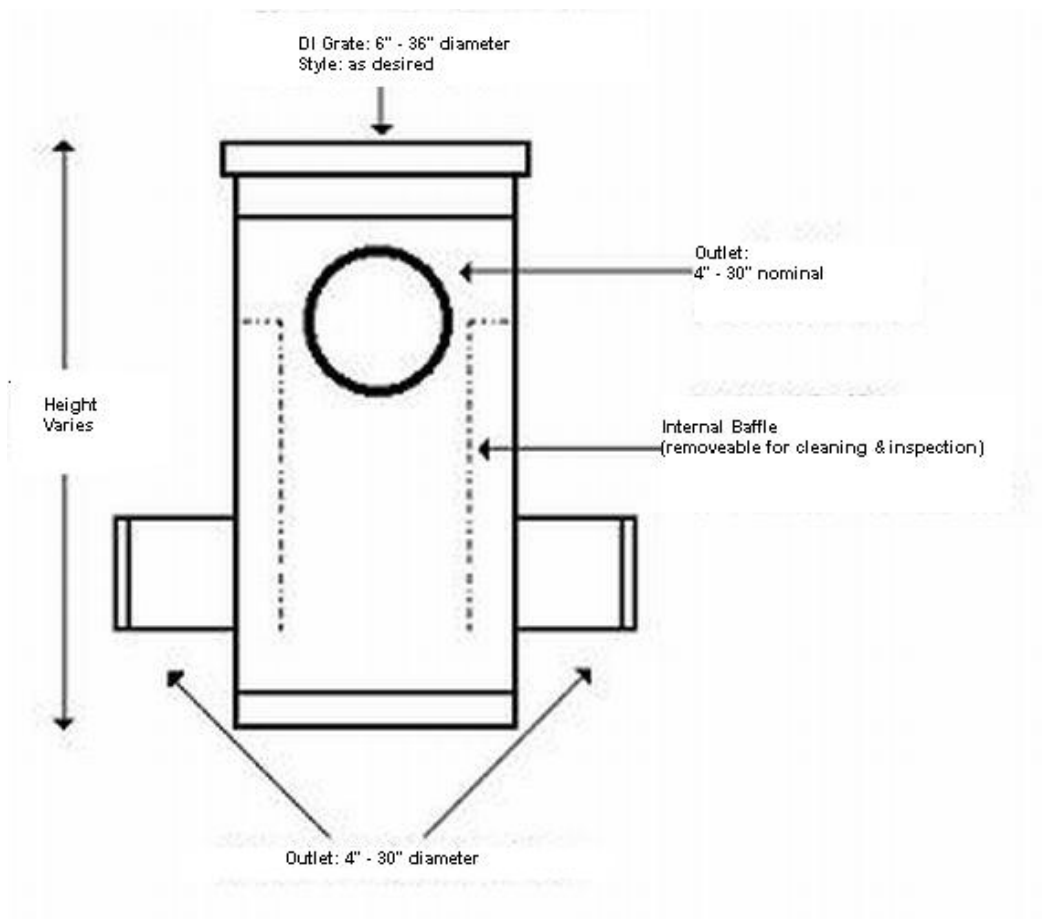

(Not to scale. Due to various factors affecting the production process, all dimensions are approximate).

Material meets the requirements of ASTM D3034/SDR35 including but not limited to the following:

- D1784 Specification for rigid poly (vinyl chloride) (PVC) compounds and chlorinated poly (vinyl chloride) (CPVC) compounds
- D2321 Practice for underground installation of flexible thermoplastic sewer pipe
- D2412 Test method for external loading properties of plastic pipe by parallel-plate loading
- D2444 Test method for impact resistance of thermoplastic pipe & fittings by means of a TUP (falling weight)
- D2855 Practice for making solvent-cemented joints with poly (vinyl chloride) (PVC) pipe & fittings

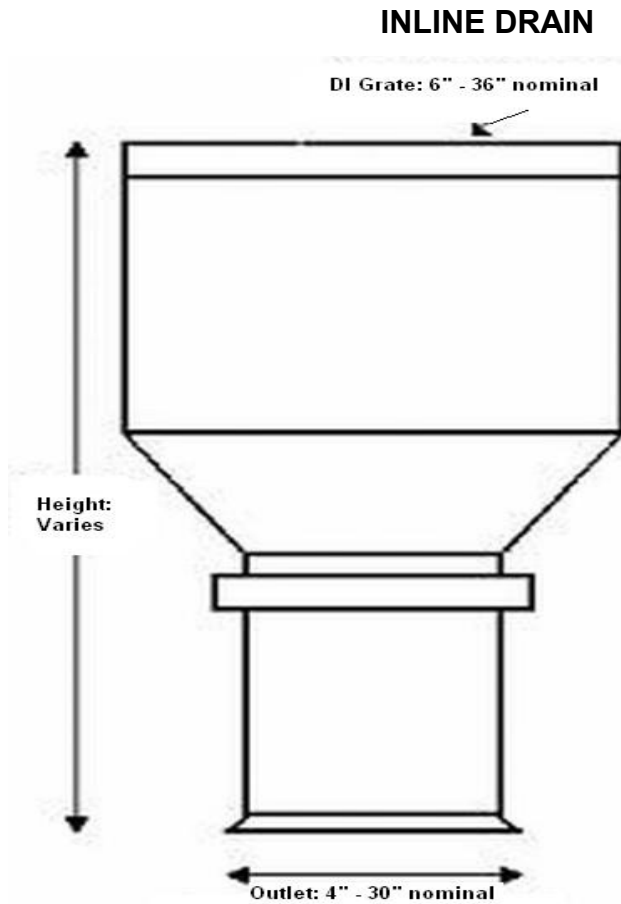

CATCH BASIN DRAIN WITH BAFFLE

(Not to scale. Due to various factors affecting the production process, all dimensions are approximate).

Material meets the requirements of ASTM D3034/SDR35/F679/F1336 including but not limited to the following:

- D1784 Specification for rigid poly (vinyl chloride) (PVC) compounds and chlorinated poly (vinyl chloride) (CPVC) compounds
- D2321 Practice for underground installation of flexible thermoplastic sewer pipe
- D2412 Test method for external loading properties of plastic pipe by parallel-plate loading
- D2444 Test method for impact resistance of thermoplastic pipe & fittings by means of a TUP (falling weight)
- D2855 Practice for making solvent-cemented joints with poly (vinyl chloride) (PVC) pipe & fittings

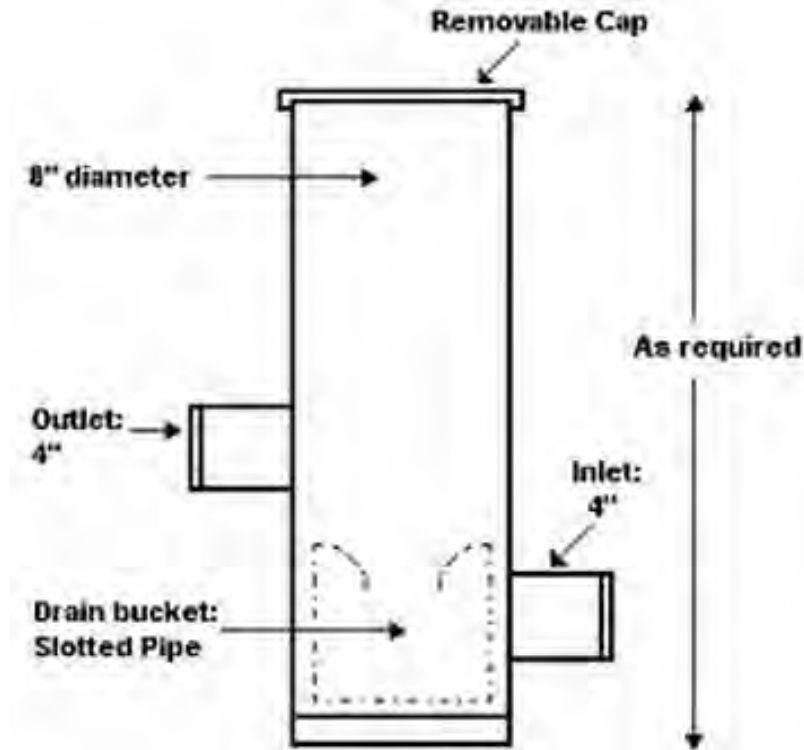

(Not to scale. Due to various factors affecting the production process, all dimensions are approximate.)

Material meets the requirements of ASTM D3034/SDR35 including but not limited to the following:

- D1784 Specification for rigid poly (vinyl chloride) (PVC) compounds and chlorinated poly (vinyl chloride) (CPVC) compounds
- D2321 Practice for underground installation of flexible thermoplastic sewer pipe
- D2412 Test method for external loading properties of plastic pipe by parallel-plate loading
- D2444 Test method for impact resistance of thermoplastic pipe & fittings by means of a TUP (falling weight)
- D2855 Practice for making solvent-cemented joints with poly (vinyl chloride) (PVC) pipe & fittings

STORMWATER DEBRIS CATCH BASIN DRAIN

(Not to scale. Due to various factors affecting the production process, all dimensions are approximate).

The basin will handle up to 164 gallons a minute when there are no obstructions.

Material meets the requirements of ASTM D3034/SDR35

Housing:	8" class 63 PVC pipe per ASTM D1785
Drain bucket:	PVC slotted pipe meeting requirements of ASTM D1785
Removable cap:	PVC pipe meeting requirements of ASTM D1784

CATCH BASIN ORDER FORM

IMPORTANT:

When determining position of inlet(s)/outlet(s) on drain basins, be sure to factor in actual outside dimension of openings needed. For example, 15" HDPE has an outside diameter of 18.7" (+ 15% for work area) so be sure to leave enough space between inlet(s)/outlet(s).

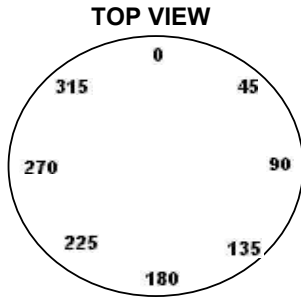

Terms and Conditions

Careful consideration of this detail will eliminate overlapping of inlet(s)/outlet(s), reduce confusion and facilitate fabrication.

ALL CATCH BASINS ARE NON-RETURNABLE AND NON-CANCELABLE AFTER PLACEMENT OF ORDER.

WARRANTY: Specified Fittings, LLC warrants all new SF products against defects resulting from faulty workmanship or materials for a period of one (1) year from the date of original purchase.

SFI will replace or repair at its option, any product established to be so defective, with a product of like type. Claims for labor costs and other charges resulting from the use of SFI products are not covered by this warranty.

This warranty is effective only for the benefit of the original purchaser and user and provided the following procedure is followed. **FAILURE TO ADHERE TO THE REQUIREMENTS OUTLINED BELOW WILL INVALIDATE THE TERMS OF THIS WARRANTY.**

- Within thirty (30) days after noticing the defect, purchaser/user must notify Specified Fittings, LLC, IN WRITING, at its corporate offices located at 164 West Smith Road, PO Box 28157, Bellingham, WA 98228, of the alleged defect.
- Upon request by SF, purchaser/user must either return the defective fitting(s) to SF, freight prepaid, or at the option of SF, make the defective fitting(s) available for inspection by a duly appointed SF representative. (In the event that the product is found to be defective because of a manufacturing error, the freight cost will be reimbursed to the purchaser/user.)

After SF repairs and/or replaces the product, it will ship the product back to the purchaser/user, freight prepaid. This warranty pertains only to products that have not been altered or damaged or used beyond their intended application. This warranty is in lieu of all other warranties, express or implied, of the merchantability or fitness for a particular purpose, which would otherwise extend beyond the warranties specified herein. This warranty specifically excludes incidental or consequential damages of any kind. However, some states do not allow exclusion or limitation of implied warranties or incidental or consequential damages so the above limitation may not apply to you.

In the event that a dispute arises, the parties agree to be governed by the conditions outlined below until a resolution is achieved.

- Independent third party testing of the alleged defective product shall be conducted and all costs in connection with such testing shall be borne by the party proved incorrect in the allegation.
- Mediation by a third party if agreed by the
- Arbitration by third party if agreed by the parties.
- Legal recourse with the losing side to pay all legal fees incurred by both parties.

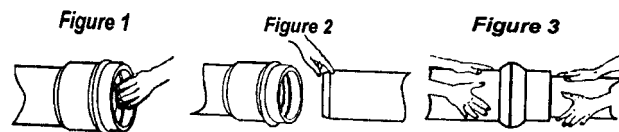

This warranty gives you specific legal rights and you may also have other rights, which vary from state to state.

RECOMMENDATIONS FOR INSTALLERS AND USERS:

SOLVENT WELD CONNECTIONS-- Use a quality grade of primer and solvent cement formulated for the type of connection, with the **CORRECT SIZE APPLICATOR**. Read and follow all of the solvent weld manufacturer's application and cure time instructions thoroughly. Before applying primer and cement, appropriate safety precautions should be taken. Primer and cement should be stored in the shade between 40°F and 110°F. Eliminate all ignition sources. Avoid breathing of vapors. Use only with adequate ventilation; explosion-proof general mechanical ventilation or local exhaust is recommended to maintain vapor concentrations below recommended exposure limits. In confined or partially enclosed areas, a NIOSH-approved organic vapor cartridge respirator with full-face piece is recommended. Containers should be kept tightly closed when not in use, and covered as much as possible when in use. Avoid frequent contact with skin; wearing PVA coated protective gloves and impervious apron are recommended. Avoid any contact with eyes; splash proof chemical goggles are recommended.

THREADED CONNECTIONS – SF recommends the use of a quality grade thread sealant. Choice of either Teflon tape, paste, or other pipe joint compound is at the discretion of the installer. The manufacturer's literature for these products should be reviewed for proper selection and application procedures. **WARNING: SOME PIPE JOINT COMPOUNDS OR TEFLON PASTES MAY CONTAIN SUBSTANCES THAT COULD CAUSE STRESS CRACKING TO PLASTIC.** 1 to 2 turns beyond FINGER TIGHT are generally all that is required to make a sound plastic threaded connection. Unnecessary **OVERTIGHTENING** will cause **DAMAGE TO BOTH PIPE AND FITTING.**

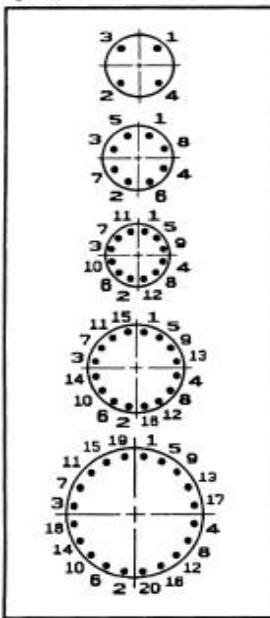

GASKET CONNECTIONS – Gasket area and pipe or spigot end should be clean and free of dirt and debris. Do not attempt to remove the formed-in gasket (Figure 1). Lubricate the entire sealing surface of the gasket and the pipe or spigot end with a light coating of a suitable lubricant (Figure 2). Push the pipe or spigot end into the gasket bell while maintaining a straight alignment. The proper insertion depth is equal to the total gasket bell length minus one-half inch (1/2") (Figure 3).

FLANGE CONNECTIONS – Once a flange is joined to pipe, the method for joining two flanges is as follows:

- Piping runs joined to the flanges must be installed in a straight-line position to the flange to avoid stress at the flange due to misalignment. Piping must also be secured and supported to prevent lateral movement, which can create stress and damage to the flange.
- With gasket in place, align the boltholes of the mating flanges by rotating the ring into position. (Consideration should be given to alignment of one-piece flange prior to joining with pipe.)
- Insert all bolts, washers (two standard flat washers per bolt) and nuts.
- Make sure the faces of the mating surfaces are flush against gasket prior to bolting down the flanges.
- Tighten the nuts by hand until they are snug. Establish uniform pressure over the flange face by tightening the bolts in 5-ft. lbs. increments according to the sequence shown in Figure 1 following a 180° opposing sequence.

Figure 1

Flange Size	Recommended Torque (Ft. Lbs.)
1/2 - 1-1/2	10 - 15
2 - 4	20 - 30
6 - 8	33 - 50
10	53 - 75
12	80 - 110
14 - 24	110

- Care must be taken to avoid “bending” the flange when joining a flange to a “raised face” flange, or a wafer-style valve. Do not use bolts to bring together improperly mated flanges.

CAUTION: Unnecessary over-torquing will damage the flange.

FOR GROOVED END, LAP JOINT END, etc., contact factory.

IMPORTANT

WATER HAMMER – SF recommends that all PVC and CPVC plastic piping systems be designed and constructed to **AVOID EXCESSIVE WATER HAMMER**. Water hammer can cause damage and failure to pipe, valves, and fittings within the piping system.

NOTE – When temperatures rise above 73°F, the tensile strength of thermoplastics decreases, thereby derating the pipe or fitting Maximum Internal Pressure. When temperatures fall below 73°F, the tensile strength of thermoplastics increases. However, the impact strength decreases. Maximum operating temperatures for PVC piping systems should not exceed 140°F (110°F threaded systems). Maximum operating temperatures for CPVC piping systems should not exceed 200°F (150°F threaded systems).

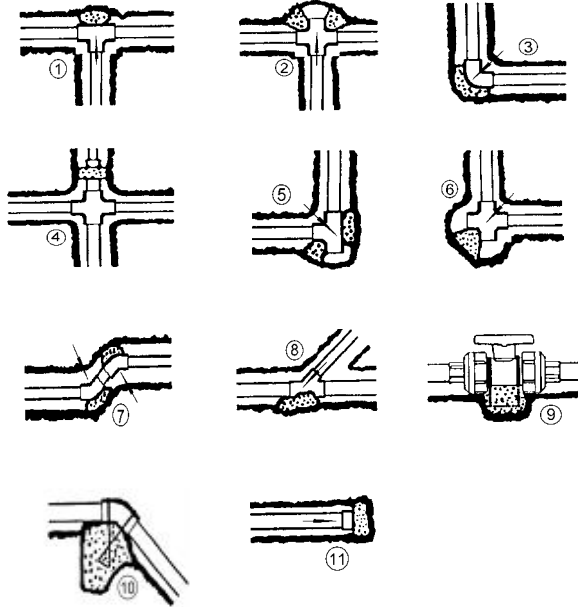

CAUTION – **SF DOES NOT RECOMMEND** the use of thermoplastic piping products for systems to transport or store compressed air or gases, or the testing of thermoplastic piping systems with compressed air or gases in above and below ground locations. The use of SFI products in compressed air or gas systems automatically voids SF’s warranty for such products and their use against our recommendation is entirely the responsibility and liability of the installer. SF will not accept responsibility for damage or impairment of its products, or other consequential or incidental damages caused by misapplication, incorrect assembly, and/or exposure to harmful substances or conditions.

THRUST BLOCKING – Water under pressure exerts thrust forces in piping systems. Thrust blocking should be provided, as necessary, to prevent movement of pipe or appurtenances in response to thrust.

Types of thrust blocking:

- Through line connection, tee
- Through line connection, cross used as tee
- Direction change, elbow
- Change in line size, reducer
- Direction change, tee used as elbow

- (8) Through line connection, wye
- (9) Valve anchor
- (10) Direction change vertical, bend anchor
- (11) End caps (above or below ground)

Thrust blocking is required wherever the pipeline:

- Changes direction (e.g. tees, bends, ells, crosses)
- Changes size at its reducers
- Stops, as at dead ends
- Valves and hydrants, at which thrust develops when closed.

Size and type of thrust blocking depends on:

- Maximum system pressure
- Pipe size
- Type and size of fittings or appurtenances
- Line profile (horizontal or vertical bends)
- Soil type

- (6) Direction change, cross used as elbow
- (7) Direction change
 - We are customer friendly. If we can't build it or get it for you, we will do everything we can to find a source for your needs.
 - We ship until 4:30 PM weekdays if material is in stock.
 - We try to keep our turnaround time to three working days or less from the date you place your order.
- We will arrange emergency deliveries on Saturday.

- We can give you access to information even on weekends.
- We have no minimum billing so no order is too small.
- We will be pleased to quote any inquiry and we try to get back to you within three hours.
- Sample fittings are available and can be shipped direct to you or your customer(s) so that you or they can see the quality of our fabrication and gasket.

Our full line of catalogs was designed to offer the estimator/customer the broadest range of fittings, prices and information available. You will find most configurations presently used in the marketplace and those not listed are available by contacting

All fittings fabricated by Specified Fittings, LLC, conform to ASTM/ANSI standards, unless otherwise noted, and certification letters, specification sheets and technical drawings are available on request. Prior to shipment, all products are inspected to ensure that they meet our stringent quality control standards and all items are labeled.

In addition to our own products, we offer other commodities such as injection-molded sewer, C-907, SDR21 gasketed and PVC DWV to complement our line and provide you, our customer, with a one stop purchasing source.
