Volume Control Valve & Trim

INSTALLATION INSTRUCTIONS

THANK YOU FOR CHOOSING KALLISTA

We appreciate your commitment to KALLISTA quality products. Please take a moment to review this manual before you install your KALLISTA product. If you encounter any installation or performance problems, please do not hesitate to contact us at the phone number listed at the bottom of the page.

BEFORE YOU BEGIN

- □ Observe all local plumbing and building codes.
- □ Shut off the water supply.
- □ The appearance of your product may differ from what is shown in these instructions, however, the installation procedure is the same.
- □ KALLISTA reserves the right to make revisions in the design of products without notice, as specified in the Price Book.

INSTALLATION INSTRUCTIONS

- □ Determine the thickness of the finished wall. Plumb the valve in the unfinished wall making sure that the centerline of the valve will be between 3-1/4" (83 mm) and 4-1/4" (108 mm) from the finished wall.
- □ Install the finished wall leaving a 1-1/4" (32 mm) hole around the valve sleeve.
- Measure the distance the valve sleeve protrudes from the finished wall. If this distance is greater than 5/8" (16 mm), mark the valve sleeve at 5/8" (16 mm) from the finished wall.
- □ Remove the valve sleeve from the valve. Remove the spline from the valve sleeve. Cut the valve sleeve at the mark.
- Reinstall the spline all the way into the valve sleeve. Measure the distance the spline protrudes from the valve sleeve. If this distance is greater than 1/2" (13 mm), mark the spline at 1/2" (13 mm). Remove the spline from the valve sleeve. Cut the spline at the mark.
- □ Reinstall the spline into the valve sleeve. Reassemble the valve sleeve and the spline into the valve.

INSTALLATION INSTRUCTIONS

- □ Slide the handle assembly over the valve sleeve and spline so that the handle assembly engages the spline. Rotate the handle counterclockwise until the valve is in the closed position. Remove the handle assembly.
- □ Thread the wall adapter onto the valve until it is snug against the wall.
- □ Slide the handle assembly onto the valve sleeve and spline, aligning the handle as desired.
- □ Holding the handle in one hand, use the other hand to rotate the escutcheon until the threads are fully engaged with the threads on the wall adapter and the handle assembly is snug against the wall.
- □ If desired, apply a bead of clear sealant around the perimeter of the escutcheon.
