Product warranties and parts information may also be found under "Products" on our web site at bradleycorp.com.

Safety Information

To ensure proper operation:

Installation

This fixture has been designed and 3rd party tested to meet ANSI/ISEA Z358.1. The system must be tested periodically to be sure it is functioning properly to meet the standard. Please refer to the ANSI/ISEA Z358.1 standard on testing requirements.

The installation, maintenance and location of all safety drench showers, eye and eye/face washes must comply with the requirements of ANSI/ISEA Z358.1. Workers who may come in contact with potentially hazardous materials should be trained regarding the location and proper operation of emergency equipment per ANSI/ISEA Z358.1.

ANSI/ISEA Z358.1 requires this unit to be used with a clean, potable, uninterrupted supply of tepid water. Bradley plumbed emergency fixtures require a minimum of 30 psi flowing pressure in order to function as designed and meet the ANSI/ISEA Z358.1 standard.

Before installation make sure that this equipment will meet the requirements of the potential hazardous contaminants in your location.

Installation of this system must be completed by a qualified plumber in compliance with all national and local codes. Compliance and conformity to drain requirements and other local codes and ordinances is the responsibility of the installer.

Weekly Inspections

To ensure all emergency shower and eye/face wash fixtures are ready to be used when needed, regular checks and maintenance must be conducted. Weekly inspections must be conducted on all safety equipment to make sure a suitable flushing fluid supply is present and to make sure the equipment is in good operating condition.

Water Temperature

ANSI/ISEA Z358.1 requires tepid water. Suitable range is 60°F to 100°F (16°C to 38°C). Personal injury is possible outside this temperature range.

Supplies Required

- Pipe sealant and teflon tape
- Piping to 1" NPT water supply inlet
- Adequate supply pipe supports
- Minimum 4" (102 mm) drain to accommodate 30 gallons (115 liters) per minute discharge for shower waste
- Sign-mounting hardware

Local codes may require the installation of a backflow prevention valve to complete proper installation. Backflow prevention valves are not included with the fixture and may be supplied by the contractor or purchased from Bradley Corporation.

Assemble Components

1. Assemble components as shown on page 4.
2. Apply pipe sealant or tape (by installer) to all male-threaded pipe joints.
3. Bottom edge of showerhead should be 7'-0" (2134 mm) from the floor.

Connect Water Supply

NOTICE! Do not rely on Bradley's Drench Shower to support supply piping.

1. Connect water supply piping to 1" NPT inlet on unit (piping supplied by installer). Provide adequate supports (supplied by installer) for supply pipe using pipe hangers or other means.
2. Mount the safety sign to the wall using sign-mounting hardware supplied by installer.
3. Open water supply lines. Test for leaks and adequate water flow.

Assembly of Components

Parts List

Item	Part No.	Qty.	Description
1	S30-059	1	Stay-Open Ball Valve Assembly
1.1	S27-278	1	1" Ball Valve with Jam Nut
1.11	110-214	1	Jam Nut only
1.2	124-048	1	Washer, Friction
1.3	153-489	1	Adapter
1.4	128-201	1	Handle
2	128-156A	1	Pull Rod
3	151-001	2	Curtain Hook
4	113-594	1	Pipe 1" NPT x 12"

Item	Part No.	Qty.	Description
5	169-1073	1	90° Elbow NPT
6	S24-189	1	Plastic Showerhead and Stainless Steel Shroud Assembly
6.1	S24-193	1	Shroud Assembly
6.11	187-053	1	Showerhead Shell
6.12	154-147	1	Ring
6.2	S24-188	1	Plastic Showerhead Assembly
7	114-050	1	Safety Sign
8	204-421	1	Emergency Inspection Tag
