

SUBMITTAL INFORMATION

Mechanical Joint Retainer (UFR1500-SA-x-U style)

3" - 12" SERIES UFR1500 MECHANICAL JOINT RESTRAINT FOR IPS PVC PACKAGED WITH ACCESSORIES

Ductile iron actuating screw, with the Auto-Tork break-away head design, ensures proper torque during installation

Bolt Hole Cross Section

Safety stop ensures ring segments can never be over-tightened

Mechanical joint transition gasket

High strength, low alloy t-bolts & nuts (AWWA C111)

Gland body is of high strength ductile iron per ASTM A536, grade 65-45-12. Compatible with all mechanical joints conforming to ANSI / AWWA C111 / A21.11

Ring segments are ductile iron per ASTM A536 and heat treated to a hardness of 370 BHN minimum

*Maximum O.D. of gland on pipe before Auto-Tork heads are removed (as shipped)

**Maximum O.D. of gland on pipe after Auto-Tork heads are removed

FEATURES

- Full circle contact and support of the pipe wall
- "Auto-Tork" actuating screws with heads specially designed to twist off at the correct installation torque, leaving a hex head in case future system maintenance or removal is required
- Set of high strength, low alloy t-bolts and nuts (AWWA C111)
- Mechanical joint transition gasket (AWWA C111)
- Series 1500 eliminates the need to pour expensive and time consuming concrete thrust blocks
- Restraining segments are mechanically retained in pockets
- Gland, screws and segments are black epoxy coated using the e-coat process
- Gland colored red for identification purposes
