XTRA SLIM JAW

NEW 8SWCB

NEW 6SWCB

JAW DESIGN

Xtra Slim $\frac{3}{16}$ " jaws mean extra reach and maximum accessibility.

CODE BLUE®

Our signature CODE BLUE® grips are designed for durability and comfort.

JAW CAPACITY

The super wide opening lets you tackle big jobs with a compact wrench.

ADJUSTABLE WRENCHES

CHANNELLOCK® Adjustable Wrenches have an endless number of uses. Strong, reliable and versatile — it's exactly what America has come to expect from CHANNELLOCK®.

JAW DESIGN

Longer jaws grip better, while thinner jaws give greater access in tight spaces.

ADJUSTABLE

4-thread knurl and non-protruding jaws provide greater capacity. Minimal head width improves performance in confined areas.

MEASUREMENT SCALES

Measurement scales (in. on front and mm. on reverse) are handy for sizing nuts and pipe and tube diameters.
