Position	Count	Description	Unit price
		<p>BMQE Motor</p> <p>The MSE 3 motors are based on state-of-the-art technology within permanent magnets (PM motor), which accounts for the high motor efficiencies. In addition, the motors have a built-in electronic unit with a frequency converter for variable frequency and soft starting. The MSE 3 motors features high efficiency within a wide load range. The high and flat efficiency curve of the PM motor enables the same motor to cover a wide power range as opposed to conventional AC motors. For BMQE pumps, this means fewer motor variants.</p> <p>EZ Boost Controller</p> <p>The BMQE pump features variable speed which is offered through frequency control via the EZ Boost controller. As a consequence, the pump can be set to operate in any duty point in the range between the minimum and maximum performance curves of the pump. Each BMQE pump must be connected to its own EZ Boost controller. It is also possible to operate the BMQE without an EZ Boost controller, though the features offered will be fewer.</p> <p>Operating conditions</p> <p>Flow: Max. 39 US GPM (8.9 m3/h) Head: Max. 300 ft (91.4 m) Temperature: Max. 95°F (35°C) Operating pressure: Max. 347 PSI (23 bar) Inlet pressure: Min. 8 PSI (0.55 bar) Sound-pressure level: The sound pressure level of the BMQE is lower than 74 db[A] at a distance of 3 feet (1 meter).</p>
