

# Consistent quality. Enduring strength. Trusted for over 30 years.

Most of you weren't in the business when we introduced Cladlite®, the first foam-core concrete A/C pad.

Installers loved the light weight.

Today, we make lighter pads with different materials, but one thing's never changed. Homeowners still expect and prefer concrete pads. And Cladlite won't let you down.

- Concrete is highly valued by homeowners
- 80% lighter than solid concrete
- Continuous steel reinforcement
- Full foam bottom resists settling and vibration
- Impervious to weather

# Cladlite® Consistency

You know this pad will perform.

Once it's set, both the pad and unit will stay in place. That permanence and the solid concrete look are what matter to the homeowner. And to quality installers. A good installation makes you look good. Cladlite—available in over 70 sizes.

The pad's durable cladding provides superior resistance to sun, moisture, and freeze-thaw conditions. The vibration-dampening EPS foam core is unaffected by water, soil conditions, fungus, or bacteria.
