

STORZ FDC Kits

Description

FPPI STORZ Kits contain all the pieces need for a complete installation of a STORZ Type Fire Department Connection. STORZ connections have been used in the fire service for decades for large diameter connections at the fire truck. Only recently has the fire service in several jurisdictions requested a STORZ Type connection to automatic fire sprinkler and stand-pipe systems. Use of STORZ connections eliminates the need for the fire service to use adapters to make their final connection to the building. FPPI STORZ Fire Department Connection Kits are complete the STORZ Connection FDC, STORZ Cap and 4" IPS identification sign. Additional information on each individual component may be found at www.fppi.com.
