SHALLOW SERIES CANOPIES

For Uneven Ceilings

Our Shallow Series canopies are specifically designed to compensate for any normal variance in length of drop after cutting, eliminating the time and labor required for recutting. Depth is graduated incrementally by one-quarter inch in a range of 1/4" to 2". All canopies accommodate varying depths without any noticeable difference when installed.

Dimensions shown at right.

SHALLOW SERIES CANOPIES

#25

Diameter: 3"
Depth: 1/4"

#25B

Diameter: 3-1/4"
Depth: 1/4"
