

⚠ WARNING

Keep Handle at straight (90° angle) from pipe and use gradual force when turning pipe. Sudden force or angled handle may cause slippage on the pipe and could cause serious injuries.

Make sure your workplace is clean and uncluttered to avoid any accidents

⚠ CAUTION

Be sure to use this wrench for the pipe size described. Do **NOT** extend handle or hammer the handle to obtain extra leverage.

If you need more leverage to turn a pipe, please use regular pipe wrenches.
