10	Handle Screw	98228	3
11	Handle Nut	98229	3
12	Chain Assembly	99055	1
13	Snap	40205	1

For units equipped with an older style jaw manufactured before May 2025, a replacement requires **two new jaws** (#94331) along with the **updated pin** (#34345). The new jaw design is **not compatible** with the prior version, and mixing old and new jaws will result in improper fit and function. The new pin is larger than the original, and the old pin **cannot be used** with the new jaw style.

To ensure proper installation and performance, both jaws and the new pin must be replaced together.
