- **ADA Compliant**
- **Automatic**
The Sloan OPTIMA[®] ETF-800 Electronic Hand Washing Faucet operates by means of an infrared sensor. Once the user's hands enter the sensor's effective range, the Solenoid activates the water flow. Tempered water flows from the Faucet until hands are moved away. The Faucet then automatically shuts off and resets for the next use.
- **Hygienic**
The ultimate in sanitary protection — there are no handles to turn or buttons to push. Helps to control the spread of infectious diseases.
- **Economical**
Automatic operation provides water usage savings over other faucet devices. Reduces maintenance and operation costs.
- **Warranty**
3 year (limited)
- **Compliant to:**
ASME A112.18.1 and CSA B125.1

OPERATION

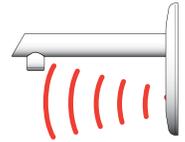

1. A continuous invisible beam of light is emitted from the OPTIMA® Sensor located below the faucet spout.

2. As the user's hands enter the beam's effective range, the beam is reflected back into the sensor receiver and activates the solenoid valve allowing tempered water to flow from the faucet. Water will flow until the hands are removed or until the faucet reaches its automatic time out limit setting.

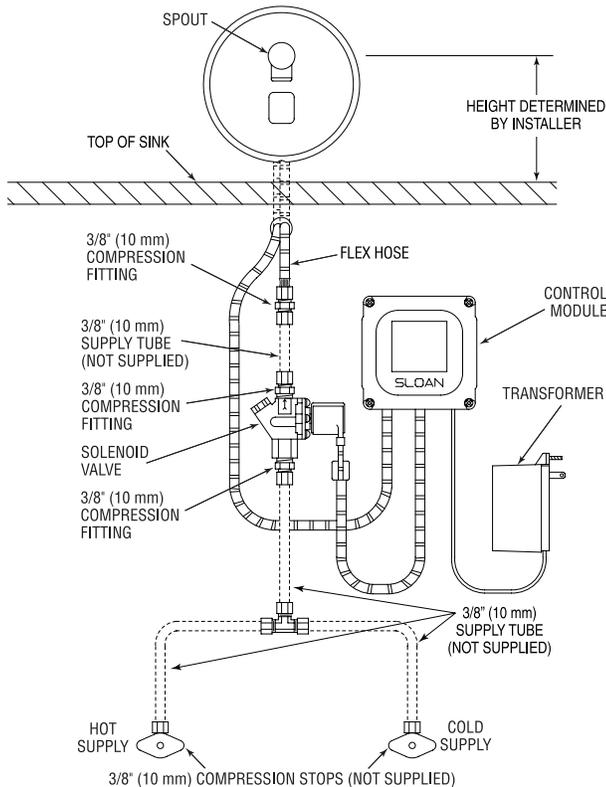

3. When hands are moved away from the OPTIMA® Sensor, the loss of reflected light initiates an electrical signal that deactivates the Solenoid Valve shutting off the water flow. The Circuit then automatically resets and is ready for the next user.
