Qwik **System Flush**®

QT1105

Can Access Valve

Includes Integrated Pressure Relief Valve!

INSTRUCTIONS:

NOTE: Ensure backseat valve is in the fully closed position before attaching to a can of Qwik **Sytem Flush** by turning the access valve knob counterclockwise.

1. Thread *Can Access Valve* to top of Qwik **System Flush** can.
2. Attach hose to flare fitting on *Can Access Valve.*
3. Place other end of hose on flare fitting or attach to Line Set Flush Tool (QT1110) and set at point of injection should no fitting be present on the system.
4. Holding the Qwik **System Flush** upside down, twist knob of *Can Access Valve* clockwise to release product.
5. Twist knob counterclockwise to close valve and stop releasing. Close valve prior to disconnecting from system.
