SQUARE U-BOLT (WINDOW) STRUT TO BEAM CLAMP

The FNW 7804 U-Bolt Beam Clamp is designed to attach strut channel to the bottom flange of an I-beam.

MADE IN THE
USA

FEATURES

- Made in the USA
- This beam clamp features a 1/4" thick plate and a 3/8" diameter U-bolt (hex nuts included)
- For 13/16" & 1-5/8" channels
- Design load 2,000 lbs (8.90 kN) when installed as intended
- To be used in pairs only
- Sold individually

PRODUCT SPECIFICATIONS

Material Specifications and Finishes

Carbon Steel – ASTM A1011-00 SS GR 33 or ASTM A1011-00CS Type B

Z: Electro-Galvanized (standard finish). Electroplating deposits zinc on the surface of the steel by electrolysis from a bath of zinc salts. Recommended for relatively dry indoor use. This is the standard coating for most FNW strut products. Thickness of applied zinc is between 0.2 mils to 0.5 mils [5.1 μm to 12.7 μm]. Coatings on FNW Z products meet ASTM B633 SC1 Type III.

HD: Hot Dip Galvanized After Fabrication. Fabricated product is dipped in molten zinc and is completely covered on all surfaces. Recommended for outdoor use. Coatings on FNW HD products meet ASTM A123/153. The zinc coating is typically 2.6 mils [66.0 μm] or 1.5 oz. per square foot [0.46 kg per square meter] per side.

S4: 304 Stainless Steel – ASTM A240 (Type 304)

S6: 316 Stainless Steel – ASTM A240 (Type 316), 316 Stainless Steel Nuts – ASTM A276-03

Y: Yellow Zinc Dichromate. A 0.5 mil [12.7 μm] electro-galvanized zinc plating meeting ASTM B633 SC1 Type III is applied to the surface of the metal. Yellow dichromate is applied over the zinc. This results in a yellowish gold appearance and acts as a nonporous barrier sealant that is corrosion resistant and can be painted.
