

Radiance® Bath Surface Heating System

Radiance® is a thermal therapy innovation from MTI that applies radiant heat technology to Designer Collection tubs, also available for many of MTI's Designer Collection shower bases. Factory-installed and fully integrated, Radiance warms the interior surface of the bath for neck, shoulders, back and bottom, providing an even distribution of warmth to eliminate the shock of a cold tub and increasing relaxation during the bath.

One Radiance system includes electrical heating grids for 2 heated zones plus all of the electronic controls. Heated zones can vary from 85-100°, depending on ambient temperature of room.

End drain 1-person tubs

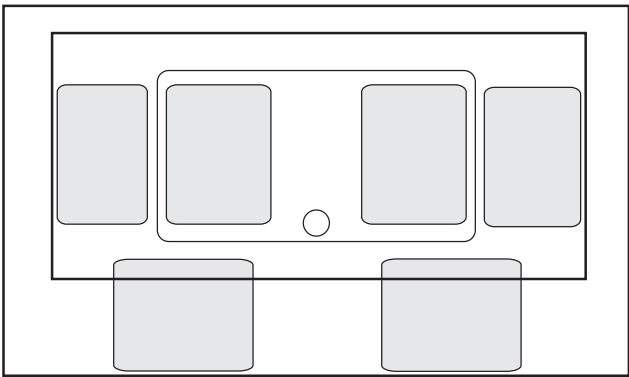

- Radiance zones heat the backrest and floor opposite the drain.

Center drain 2-person tubs (Radiance zones must be specified on order)

- Both backrests (one system)
- Backrest and floor at either end of the tub (one system)
- Both backrests and floor at each end (two systems)

Metro Tubs — models 83, 84 and 175 (Radiance zones must be specified on order)

- Wide deck area can be equipped with one or both heating zones, providing a warm seating or transitional area.
- Each additional two (2) zones to be heated require an additional Radiance system.

Radiance® (RAD100) \$1,595
Must be ordered with tub

Keypad, shown to the left connects to the control box using a 6' cable. If additional length is needed (up to 12'), please specify on order.
